Historic Designation (*Check One*) - Landmark District

PROPOSED WORK FOR WHICH CERTIFICATE OF APPROPRIATENESS IS BEING REQUESTED

1. Describe and/or illustrate fully the proposed work to be done: (*Plans associated with building permit applications can be referenced. If approval of an addition or detached accessory building is requested, submit a site plan showing the measurements of the lot, the existing buildings and proposed changes and the front, back and side yard setbacks. If approval of a demolition is being requested, submit a site plan of the property and the structure(s) to be demolished.*)

2. Describe how the proposed work will change, destroy, or affect any external feature of the structure or site:

3. How will the proposed work affect the preservation, protection, perpetuation and economic use of the structure or district?

4. Attach a statement indicating how the proposed work meets each applicable criterion provided in “EXHIBIT A”, which is attached to this application form.

5. State any additional information which you feel the Zoning Administrator or the Historic Preservation Commission should consider in issuing a Certificate of Appropriateness for the proposed work:

NOTE: If additional space is needed to accurately answer any question, please attach extra pages to the application. By submitting this application, you are granting permission for City staff to post on the property a temporary yard sign announcing the public hearing to be held for your request.

CERTIFICATION BY THE APPLICANT

I certify all the information contained in this application form or any attachment(s), document(s) or plan(s) submitted herewith are true to the best of my knowledge and belief, and that I am either the property owner or authorized to make this application on the owner’s behalf.

Exhibit “A”

(Please respond to the Criteria a through h, indicated by the underlined text)

Review Criteria for Certificate of Appropriateness.

In making a determination whether to issue or deny a Certificate of Appropriateness, if the proposed activities cannot be considered “minor works” as identified in Table XII-1 and Table XII-2, the Historic Preservation Commission shall consider, among other things, the effect of the proposed alteration, relocation, construction, removal or demolition upon the exterior architectural features and upon the historic value, characteristics and significance of the landmark or of the historic district.

The criteria to be used by the Preservation Commission in making its determination shall include, but not be limited to:

1. The maintenance of the significant original qualities or character of the buildings, structures, sites or objects including, if significant, its appurtenances. The removal or alteration of any historic or distinctive architectural features should be avoided whenever possible.
2. The compatibility of proposed new additions and new construction to the original architecture or the landmark or styles within the historic district shall be evaluated against the following general guidelines:
 - a. *Height*: The height of the proposed building or structure or additions or alterations should be compatible with surrounding buildings or structures.
 - b. *Proportions of structure’s front façade*: The proportion between the width and height of the proposed building or structure should be compatible with nearby buildings or structures.
 - c. *Proportions of openings into the facility*: The proportions and relationships between doors and windows should be compatible with existing buildings and structures.
 - d. *Relationship of building masses and spaces*: The relationship of a building or structure to the open space between it and adjoining buildings or structures should be compatible.
 - e. *Roof shapes*: The design of the roof should be compatible with that of adjoining buildings and structures.
 - f. *Appurtenances*: Use of appurtenances should be sensitive to the individual building or structure, its occupants and their needs.
 - g. *Scale of building or structure*: The scale of the building or structure should be compatible with that of surrounding buildings or structures.
 - h. *Directional expression of front elevation*: Street façades should blend in with other buildings and structures with regard to directional expression when adjacent buildings or structures have a dominant horizontal or vertical expression.

Exhibit “A” Continued
(Please feel free to respond to the Criteria a through j, if they are applicable)

The Secretary of the Interior’s “Standards for Historic Preservation Projects”, as revised from time to time, as follows:

- a. Every reasonable effort shall be made to use a property for its originally intended purpose, or to provide a compatible use for a property that requires minimal alteration of the building, structure, site or object and its environment.
- b. The distinguishing historic qualities or character of a building, structure, site or object and its environment shall not be destroyed. The removal or alteration of any historic material or distinctive architectural features should be avoided when possible.
- c. All buildings, structures, sites and objects shall be recognized as products of their own time. Alterations that have no historical basis and which seek to create an earlier appearance shall be discouraged.
- d. Changes that may have taken place in the course of time are evidence of the history and development of a building, structure, site or object and its environment. These changes may have acquired significance in their own right, and this significance shall be recognized and respected.
- e. Distinctive stylistic features or examples of skilled craftsmanship that characterize a building, structure, site or object shall be treated with sensitivity.
- f. Deteriorated architectural features shall be repaired rather than replaced, wherever feasible. In the event replacement is necessary, the new material should match the material being replaced in composition, design, color, texture and other visual qualities. Repair or replacement of missing architectural features should be based on accurate duplications of features, substantiated by historic, physical or pictorial evidence rather than on conjectural designs or the availability of different architectural elements from other buildings, structures, sites or objects.
- g. The surface cleaning of buildings, structures, sites or objects shall be undertaken utilizing the gentlest means possible. Sandblasting and other cleaning methods that may damage the historic building materials shall not be undertaken.
- h. Every reasonable effort shall be made to protect and preserve archeological resources affected by or adjacent to any project.
- i. Contemporary design for alterations and additions to existing properties shall not be discouraged when such alterations and additions do not destroy significant historical, architectural or cultural material and such design is compatible with the size, scale, color, material and character of the property, neighborhood or environment.
- j. Wherever possible, new additions or alterations to buildings or structures shall be done in such manner that if such additions or alterations were to be removed in the future, the essential form and integrity of the building or structure would remain unimpaired.
