

**CITY OF URBANA, ILLINOIS
FINANCE DEPARTMENT**

MEMORANDUM

TO: Mayor Diane Wolfe Marlin and City Council Members
FROM: Elizabeth Hannan, Finance Director
DATE: February 27, 2020
SUBJECT: **Intergovernmental Agreement with Police Pension Fund Board**

Introduction: Attached is a Resolution that would authorize the Mayor to enter into an intergovernmental agreement to provide payroll services for the Police Pension Fund.

Discussion:

Previous Practice: In the past, the payroll for the Police Pension Fund has been prepared by a City employee outside of regular work hours. This employee was compensated directly by the Pension Fund for this work. This arrangement required use of the financial system on the City's AS400 computer system, which is being decommissioned. As a result, the payroll for the Pension Fund must be completed through some other means.

Proposed Arrangement with Police Pension Fund: Staff proposes to enter into an agreement with the Pension Fund to provide payroll services using the City's Munis financial system. Because the person performing this work will have access to the City's payroll system, staff recommends that this work be performed by a City employee, who would work under the direction of the Financial Services Manager. Current staff are unable to absorb the additional workload.

After internal review and discussion with the Police Pension Board, staff recommends that the City enter into the attached agreement to provide these services. The Pension Fund would no longer pay directly for these services. Staff also expects the Fire Pension Fund to enter into a similar arrangement at their April board meeting, which would then be brought to City Council for approval.

The current cost for payroll services is about \$3,600 annually for each pension fund for a total of \$7,200 annually. The cost to hire an outside accounting firm to provide these services is likely to be substantially higher than the cost of a new, quarter-time position, which is expected to be not more than \$16,000 annually. This employee would provide payroll services for both pension funds. An additional advantage is that Financial Services staff would be able to provide backup for the employee assigned to perform this work, when that is required.

As discussed above, this work could be contracted out to an accounting firm. However, the costs would likely be significantly higher. The additional cost of this approach would ultimately be borne by the City through increased pension contributions.

Future Considerations: As pension fund investments are consolidated by the State over the next couple of years, the work associated with maintaining financial data on investments and other general ledger transactions will be reduced. This work is currently performed by an outside consultant, who works on a voluntary basis. For long term stability, it makes sense to transition all of the financial information onto the Munis system once the investments are consolidated. At that time, the agreement may be amended to include additional services for accounts payable, general ledger accounting, and financial reporting.

Fiscal Impact: In the long term, all pension costs become a cost for the City through pension contributions. The recommended option is the least costly choice. The alternative of contracting the work to an outside accounting firm would be more costly and would ultimately result in higher pension contributions for the City than the recommended option.

Alternatives:

1. Forward the Resolution authorizing the Mayor to enter into an intergovernmental agreement for payroll services for the Police Pension Fund to Council for approval on March 9, 2020.
2. Do not forward the resolution for approval.

Recommendation: Forward the resolution authorizing the Mayor to enter into an intergovernmental agreement for payroll services with the Police Pension Fund to City Council for approval on March 9, 2020.
