SUBJECT: **Plan Case No. 2233-S-14:** Countryside Second Subdivision Preliminary and Final Plats.

Introduction

Marcus Harris has submitted a revised Preliminary Plat and a Final Plat for the Countryside Second Subdivision, to be located east of Cottonwood Road and north of Anthony Drive. This request is a revision of Country Side Second Subdivision, which was approved by City Council in June 2013 (Ordinance No. 2013-06-053), but not recorded due to drainage considerations and the cost of installing a new public street. The revised plat no longer contains a public street, as lots have been re-arranged to provide access to the existing streets. Drainage concerns have been addressed through the creation of a detention basin on an outlet.

The site was originally part of Countryside Subdivision, and was subdivided into eight lots and a large remainder piece in 1962. The 8.38-acre site is currently used for agriculture and one single-family residential lot, and is currently zoned County AG-2, Agricultural, and CR, Conservation-Recreation. The proposed subdivision would contain six rural residential lots and an outlet containing a storm water detention basin. The applicant is also applying for a deferral to allow construction of the required sidewalks along Cottonwood Road and Anthony Drive upon City Engineer request after the adjacent parcels have been developed.

According to the Urbana Subdivision and Land Development Code, Preliminary and Final plats may be submitted for concurrent approval. The Plan Commission is requested to review the revised Preliminary Plat and Final Plat and make a recommendation to City Council for approval or denial.

Background

The site was purchased by the applicant in 2013, who intends to sell the lots for residential development. Because the applicant is not increasing the total number of lots, the County Zoning

Administrator will allow this replat without additional county zoning approvals. The original plat (Exhibit E), approved in 1962, consisted of 8 lots, ranging from 18,000 to 27,000 square feet in area, along Cottonwood Road and Anthony Drive. The current plat application excludes the area shown on the 1962 plat as Lot 1 of Country Side Subdivision.

In 2013 preliminary and final plats were approved by Plan Commission and City Council to create Country Side Second Subdivision, containing seven residential lots and a cul-de-sac street. Although approved by Council, these plats were never recorded due to difficulties in meeting drainage requirements for that lot layout and because of the cost of building a new public street. The lots have been re-arranged to eliminate the requirement for a public street and to provide better drainage, and the applicant is applying for approval of a revised Country Side Second Subdivision.

The area is outside of the Urbana-Champaign Sanitary District service area, and therefore an annexation agreement is not needed to develop the site.

Discussion

Zoning and Land Use

The northern 2.94 acres of the site is zoned County CR, Conservation-Recreation, likely due to proximity to the Saline Ditch 600 feet to the north. The remainder of the site is zoned County AG-2, Agricultural (Land uses are shown in Exhibit A). The east 130 feet of the property is wooded. There is a residence on one of the existing lots (Lot 7) along Anthony Drive. The remainder of the site is used for agriculture, although it has been platted for residential use since 1962. The surrounding areas to the west and south are zoned County AG-2, Agricultural, and are used for cropping or livestock. To the east is a wooded area, zoned County AG-2, Agricultural. To the north are residences zoned County CR, Conservation-Recreation.

2005 Comprehensive Plan

The 2005 Urbana Comprehensive Plan classifies the future land use of the subdivision as “Rural Residential”. The proposed replat would be consistent with the proposed rural residential lots shown on the comprehensive plan. The Comprehensive Plan also contains a note stating that a future Interstate 74 interchange may be located at High Cross Road, Cottonwood Road, or County Road 1800 E. The site is located just over 700 feet north of Interstate 74.

Preliminary Plat

The proposed Preliminary Plat contains all of the elements required by the Subdivision and Land Development Code, including topography, elevation, monuments, surrounding developments, streets, utilities, proposed developments, and zoning. It divides the site into six residential lots, varying in size from 1.05 to 1.56 acres, plus a 0.32-acre outlot that contains a storm water basin. Three lots will be accessed off Cottonwood Road. The other three lots face Anthony Drive, a minor collector street. Two of the lots are flag lots, with a 20-foot wide access strip. The proposed lots will conform to County zoning requirements.

Final Plat

The proposed Final Plat contains the required elements, and is consistent with the proposed preliminary plat. It shows lot boundaries, dimensions, and proposed rights-of-way to be dedicated, and contains the required surveyor's and drainage statements.

Access

Under the previous approval, a new cul-de-sac street provided access to four of the lots. The revised plat no longer has a public street, and access to the property will be provided from Anthony Drive and Cottonwood Road. Access will be restricted as follows: The access drive for Lots 13 and 14 will be limited to the eastern 40 feet of the subdivision because there is a hill that blocks the view of the west portion of the lot for vehicles approaching from the east. The Final Plat states that the flag lots, Lot 13 and Lot 12 may share a common driveway with Lot 14 and Lot 16, respectively. Lot 16 may only be accessed from the south along the eastern 33.75 feet or from the west along the northern 20 feet to keep the driveway from being built too close to the intersection of Anthony Drive and Cottonwood Road.

The applicant is requesting a sidewalk deferral for the east side of Cottonwood Road and the north side of Anthony Drive, as the adjacent sites are not yet developed, and there is no sidewalk to connect to. The requested sidewalk deferral would obligate future property owners to install the sidewalk, at the City Engineer's request, when the adjacent area develops and sidewalk is extended to meet the subject property.

Drainage

The applicant's engineer has submitted a storm water management report which must be approved by the City Engineer prior to recording of the final plat. The provision of drainage in accordance with the Subdivision Ordinance was a difficulty under the lot configuration of the plat approved in June of 2103. Under the revised configuration, drainage issues have been resolved. Outlot A, located on the western part of the development, will capture the majority of storm water that enters the site. Storm water will be released at a controlled rate into the storm sewer along Cottonwood Road, which drains into the Saline Ditch. The City Engineer has given a preliminary approval of the drainage plan.

Utilities

The site is currently not within the service area for sanitary sewer or water. The lots will be large enough to accommodate well water and septic tanks. The final plat contains covenants that require property owners to connect to the Urbana Champaign Sanitary District and to public water when those utilities become available to the site. Property owners are also required by covenant to form a Special Service Area (SSA) to raise the funds to pay for any future connection to the sanitary sewer. The final plat reserves the easements necessary for installation and repair of future public utilities extended along the east side of Cottonwood Road.

Waivers

The applicant is not requesting any waivers from the subdivision ordinance. The previously approved Country Side Second Subdivision was granted a waiver to allow the new public street to be less than

31 feet wide. The currently proposed plats no longer show a new public street, and the waiver is no longer needed.

Deferrals

The applicant is requesting to defer installation of sidewalks along the east side of Cottonwood Road and the north side of Anthony Drive, as described above. The City Engineer is in agreement with this deferral.

Summary of Staff Findings

1. Countryside Subdivision was approved in 1962, creating eight residential lots (seven of which are located on the current project site).
2. Country Side Second Subdivision was approved by City Council in June of 2013 under Ordinance No. 2013-06-053, but was not recorded due to drainage issues and the cost of building a new public street.
3. Developer Marcus Harris has submitted a revised Preliminary and Final Plat entitled Countryside Second Subdivision to replat for a rural-residential subdivision with six residential lots and one outlot at the northeast corner of Cottonwood Road and Anthony Drive.
4. The proposed Preliminary and Final Plats would be consistent with existing County CR, Conservation-Recreation and County AG-2, Agricultural zoning designations for the site.
5. The proposed Preliminary and Final Plats are consistent with the 2005 Urbana Comprehensive Plan land use designation of “Rural Residential” for the site.
6. The proposed Preliminary and Final Plats meet the technical requirements of the Urbana Subdivision and Land Development Code.
7. The developer is proposing to defer construction of sidewalks along Cottonwood Road and Anthony Drive until sidewalks are installed on an adjacent property or required to be installed by the City Engineer.
8. The proposed subdivision plats will allow for development of an underutilized area for residential use, as shown in the Comprehensive Plan.

Options

The Plan Commission has the following options in Plan Case 2233-S-14 regarding the Preliminary Plat of Countryside Second Subdivision:

- a. Recommend approval of the proposed Preliminary Plat; or
- b. Recommend City Council deny approval of the proposed Preliminary Plat. If the Plan Commission denies the proposed Preliminary Plat, Plan Commission must state findings by where the plat is deficient.

The Commission has the following options concerning the Final Plat of Countryside Second Subdivision:

- a. Recommend approval of the Final Plat; or
- b. Recommend denial of the Final Plat. If recommending denial, the Plan Commission must state findings by where the plat is deficient.

Staff Recommendations

Based on conformance with the Urbana Subdivision and Land Development Code and Comprehensive Plan, in Plan Case 2233-S-14, Staff recommends that the Plan Commission:

- Recommend the Urbana City Council APPROVE the Preliminary Plat of Countryside Second Subdivision; and
- Recommend the Urbana City Council APPROVE the Countryside Second Subdivision Final Plat, including the proposed deferral to allow construction of the sidewalks along Cottonwood Road and Anthony Drive when an adjacent sidewalk connects to the site.
