

MEMORANDUM

TO: Mayor Diane Wolfe Marlin and Members of the City Council

FROM: Tim Cowan, Public Works Director
John Zeman, City Engineer
Carmen Franks, Assistant City Engineer
Will Kolschowsky, Management Analyst

DATE: June 17, 2022

RE: 2022 Capital Improvement Plan

Description

The Capital Improvement Plan (CIP) is updated annually per Section 3 of City Council Resolution No. 8788-R14. The CIP outlines expected revenues and expenditures for capital projects and maintenance for the subsequent five fiscal years. Capital assets include: bridges, pavement, traffic signals, lighting, sidewalks, storm sewers, sanitary sewers, public facilities, and urban canopy. The CIP is comprised of five funds: Capital Replacement and Improvement (CR&I), Local Motor Fuel, State Motor Fuel, Sewer Benefit Tax, and Stormwater Utility Fee Funds. In addition to the dedicated CIP funds, many operational and maintenance activities are supported by the City's General Fund. Other funds will occasionally support capital improvement projects, but in an ancillary capacity to their primary purpose; these include: TIF funds, parking funds, and CDBG funds.

Background and Discussion

The 2022 CIP was presented at the May 16, 2022 Committee of the Whole meeting. Detailed information about asset composition, scheduled projects, and fund balances are within the attached CIP. The CIP, as well as additional information, is also available on a dedicated webpage on the City's [website](#). Since the presentation, there have been a few minor changes. These include updated interest income (adjusted downward) and some updated figures for projects between fiscal years FY 21, FY 22, and FY 23. The net impact of the minor adjustments is a reduction of ending fund balance of \$514,059 across all funds over the life of the CIP. Also, not previously included was the land purchase for fire station 2 in FY 22. This was a transfer into, and then an expense from, the CR&I Fund, resulting in no additional net impact on the fund balance.

Fiscal Impact

For FY 23 the CIP, across the five dedicated CIP funds, commits \$30,948,556 in expenses against \$26,298,578 in revenue, inclusive of \$12,000,000 in borrowing. Over the life of the 5-year CIP, there are \$96,604,433 in revenues and \$107,647,832 in expenditures outlined in the CIP, inclusive of some General Fund expenditures related to infrastructure asset operations and maintenance. Detailed fund reports and discussion are included in the attached CIP.

Recommendation

It is recommended that the attached resolution updating the CIP be approved. The proposed expenditures for FY 23 will be adopted in the FY 23 Budget Ordinance.

RESOLUTION NO. _____

A RESOLUTION APPROVING THE CAPITAL IMPROVEMENT PLAN

(2022)

WHEREAS, on April 18, 1988, the City Council authorized a capital improvement plan for the City of Urbana, pursuant to Resolution No. 8788-R14; and

WHEREAS, said Resolution requires the City Council to update such plan annually to reflect new and changing needs and project priorities.

NOW, THEREFORE, BE IT RESOLVED by the City Council, of the City of Urbana, Illinois, as follows:

The 2022 Capital Improvement Plan, in substantially the form of the copy of said Plan attached hereto and hereby incorporated by reference, be and the same is hereby authorized and approved.

PASSED BY THE CITY COUNCIL this ____ day of _____, _____.

Phyllis D. Clark, City Clerk

APPROVED BY THE MAYOR this ____ day of _____, _____.

Diane Wolfe Marlin, Mayor

SECTION 1: EXECUTIVE SUMMARY

2022 Capital Improvement Plan

Executive Summary

Introduction

This Executive Summary highlights the updates to the City's 2022 Capital Improvement Plan (CIP). The City's CIP is updated annually per Section 3 of City Council Resolution No. 8788-R14. This resolution also outlines funding policies for various types of capital improvement and maintenance projects and directs implementation through the budget process.

What is the CIP?

The CIP outlines planned projects for the subsequent five fiscal years (currently for FY 23-27) for capital improvements for City infrastructure assets. The City organizes its capital assets into eight categories: 1. Bridges 2. Public Facilities 3. Lights, Signals, & Signs 4. Road Pavement 5. Sidewalks and Pathways 6. Sanitary Sewers 7. Stormwater Facilities and 8. Arbor/Canopy.

The CIP is comprised of five major funds.

Capital Replacement and Improvement Fund (CR&I)

The CR&I Fund is replenished by transfers from the General Fund. The CR&I Fund supports transportation projects, facilities projects, and other capital projects that require unrestricted funds.

Local Motor Fuel Tax Fund

Revenue for the Local MFT Fund comes from the local gas tax ordinance, last updated July 1, 2011. Funds are used for transportation capital projects and maintenance.

State Motor Fuel Tax Fund

The State MFT Fund receives revenue from the State of Illinois' motor fuel tax. Transportation projects that utilize State funds have extra restrictions and reporting requirements and are typically reserved for larger projects. Periodic transportation grants also support this fund.

Sewer Benefit Tax Fund

The Sewer Benefit Tax Fund derives its revenue from the sewer tax and is reserved for sanitary sewer improvements.

Stormwater Utility Fee Fund

The Stormwater Utility Fee Fund derives its revenue from the stormwater utility fee and is reserved for storm sewers and stormwater-related improvements.

In addition to the dedicated CIP funds, many operational and maintenance activities are supported by the City's General Fund. Other funds will occasionally support capital improvement projects, but in an ancillary capacity to their primary purpose; these include: TIF funds, parking fund, and CDBG funds.

CIP Document

The CIP is composed of several sections:

Section 1. Executive Summary

The Executive Summary provides a high-level overview of the Capital Improvement Plan and its associated funds.

Section 2. Capital Asset Summary

The Capital Asset Summary provides a detailed financial analysis of the CIP. The Asset Summary section takes a holistic view of infrastructure assets, inclusive not only of the large capital projects reflected in CIP fund statements, but also the operational and maintenance activities required to keep infrastructure assets functional. Section 2 includes information on asset valuation, capital expenditures, operation and maintenance costs, revenue streams, and a summary fact sheet for each asset class.

Section 3. Transportation Project Book

The Transportation Project Book provides a summary for transportation projects and maintenance programs in the CIP. Transportation Assets includes: Road Pavement; Bridges; Lights, Signals, & Signs; and Sidewalks & Pathways.

Section 4. Facility Project Book

The Facility Project Book provides a summary of facility projects in the CIP as well as future projects identified from the Facilities Master Plan.

Section 5. Sewer Systems Project Book

The Sewer Systems Project Book provides a summary of projects and maintenance programs for stormwater infrastructure and sanitary sewers.

Section 6. Fund Reports

This section shows the anticipated revenues and expenditures for each of the major CIP funds. The Fund Reports are incorporated in the FY 2022-2023 Budget.

CIP Planning Process

The CIP planning process begins in earnest in January. The CIP is updated and refined using the process below and presented to Council during the budget review process. The CIP is adopted with a resolution and the proposed expenditures for the upcoming fiscal year are incorporated in, and approved by, the Budget Ordinance. The CIP is drafted with the help of an interdisciplinary team.

The general CIP planning process is as follows:

1. *Partner Outreach:* Engage City departments and other governmental partners to share CIP projects and gather information that may inform the scope, size, or timing of projects.
2. *Review Capital Projects List:* Existing projects are analyzed and new potential projects are added based on input from Operations staff, Engineering staff, a review of Master Plans, and in response to public concerns. For new projects, back of the envelope (BOE) costs are used.
3. *Review of Maintenance Programs:* Expenditures for recurring maintenance line items are reviewed to ensure that there is an appropriate amount of funds to cover prioritized expenditures.
4. *Prioritize Projects:* Information is gathered for potential projects and then prospective projects are evaluated for priority based off the data.
5. *Financial Projections:* Revenue projections and fund balances are updated each year. Grant opportunities are evaluated and considered.
6. *Asset Summary Review:* Staff update asset valuations and data to inform existing conditions and funding targets for capital replacement and investment as well as operations and maintenance.
7. *Schedule Projects for CIP:* Based off the availability of funds, the amount of expenditures on maintenance, and project prioritization, projects are added into the 5-year CIP.
8. *Review Fund Balances:* After projects are added into the CIP, the fund balances and trends are analyzed to ensure that implementation of the CIP is feasible.

Major Highlights for the 2022 Capital Improvement Plan

Mayor / City Council Strategic Goals for 2022-2023

The City Council recently passed several strategic goals related to the CIP. Strategic Area #3: Infrastructure – Strategy 1. Improve quality of current infrastructure assets. Action Step A under this strategy was to “Develop asset management plans of existing infrastructure (lighting, traffic signals, sanitary systems and bridges)”. The CIP as proposed includes resources dedicated to developing the plans and data need to complete this action step. The results of these asset management plans will inform Action Step B “Develop plan for funding, level of service, and to replace/repair/build infrastructure (based on assessment)”.

The 2022 CIP also addresses action steps for Strategy 2 – Increase investment in infrastructure equity. Action Step A, “Solicit community input for use of EQL funding” is underway and the CIP expects to complete Action Step B “Implement EQL selected projects in FY 23”. Furthermore, the CIP begins to start to address Action Step C “Incorporate an equity lens into priorities evaluation by using CDBG funds (with their location restrictions) for sidewalk improvements. Further progress on Action Step C can be made following the completion of Goal 3.1.B.

Lastly, the two new fire stations included in the CIP will allow the City to compete 3.3.B “Evaluate options to enhance sustainability and climate resiliency on City-owned property and facilities” in a comprehensive way. It should be noted that the facility project costs in the CIP are preliminary estimates based on a strict replacement of facilities in-kind. Sustainability upgrades will likely result in increased project costs above and beyond figures currently in CIP. The City is currently engaged with FGM Architects in fire station design. As part of this process, fire station component options, such as sustainability upgrades, will be developed under an essential, enhanced, or amplified framework where the costs and benefits of options can be evaluated.

Inflation

Inflation has had a substantial negative impact on the CIP. The previous year’s National Construction Cost Index increased by 21%. Projects with pre-engineering budgets have generally increased by 21%. Future year costs are typically projected to increase at the 10-year average rate of 2.9%. Not reflected in this increase is ‘value engineering’, where project scopes have been reduced to accommodate cost increases. No CIP revenue source has increased by a similar amount and many revenue streams are still below pre-pandemic projections. Therefore, the CIP’s capacity to improve infrastructure quality has been reduced in the past year.

Equity and Quality of Life Project (EQL)

The FY 21-22 budget allocated \$2 million in funding for a new Equity and Quality of Life project. The City is in the midst of scoring project applications and anticipates funding projects in the upcoming fiscal year.

Facilities Master Plan Implementation – The Need to Borrow

The bulk of implementing the Facilities Master Plan will occur during the next two calendar years, with an expected \$12 million of expenditures on City facilities. The largest projects include a City Building lobby redesign, two new fire stations, a new storage building, and a rehabilitation of Public Work facilities. For practical and financial reasons, it makes sense to undertake these projects in tight succession. However, this creates a short-term cash flow issue. In

order to undertake these facilities improvements, the City will need to borrow. City staff will evaluate the costs and benefits between intra-fund borrowing and issuing debt. Overall, the City has very little debt and has significant capacity to borrow more.

Current Transportation Projects

Transportation is an urgent focus of the CIP. The city-wide average pavement rating score is 56. Scores below 55 are considered poor. Fiscal Year 23 is an ambitious year for Transportation projects in the CIP. There are several projects that are set to conclude in FY 23, notably, Race Street from Washington Street to California Street and the Lincoln and Springfield Avenues intersection. These projects are currently underway, and will be completed in the 2022 construction season¹. A project not reflected in the current CIP is Fairlawn Avenue, which has been deprioritized out of the CIP due to the reevaluation of other transportation projects. Currently, there are five major project set to begin construction in FY 23:

- Washington Street: Bridge over Sunny Estates Ditch
- Florida Avenue: James Cherry to Curtiss
- Philo, Colorado and Andersen: Windsor to Colorado
- Windsor: Race to West Boundary
- Savannah Green: Alleys & Smith Rd

In addition, several large, grant funded projects will begin planning or engineering in FY 23 – Florida Avenue from Wright Street to Hillcrest Avenue and Lincoln Avenue from Florida Avenue to Green Street. The Florida Avenue project is the largest project in the CIP, with a current estimated budget of \$12M, most of which will come from federal grants.

Transportation Projects Beginning, Continuing, or Ending in FY 23

Project	FY22 Est.	FY23 Plan	FY24 Plan	FY25 Plan	FY26 Plan

LINCOLN: GREEN - FLORIDA	-	200,000	150,000	400,000	5,500,000

Financial Impact

To operate, maintain, and improve its infrastructure assets, the City will spend \$30M in FY 23 and \$107M over the life of the CIP. This includes both capital investment in the major CIP funds as well as operational expense incurred by the General Fund and small capital expense incurred by CDBG and TIF funds. These expenses are paired with an associated \$96M in revenue through the life of the CIP; revenues include motor fuel taxes, state and federal grants,

¹ Projects appear in the fiscal year in which the construction contract is signed and funds are encumbered. A typical transportation project will begin in the spring and continue through the summer into a new fiscal year.

and General Fund revenue allocated to the CR&I Fund and for operations. The 2022 CIP calls for spending down existing fund balances in the major capital funds.

**CIP Summary Total Spending and Associated Revenue for Capital Assets
Capital Investment in CIP Funds and Operational Expenses in General Fund**

Asset Class	FY22 EST.	FY23 Budget	FY24 Plan	FY25 Plan	FY26 Plan	FY27 Plan	Total FY23- 27	Average	% of Expenses

Capital Replacement and Improvement Fund (CR&I)

The CR&I Fund will support the ongoing Facility Master Plan project implementation. Between FY 22 and FY 23 facility projects are estimated to cost roughly \$12M, which will be funded by debt. The CR&I also funds several other infrastructure projects that require unrestricted funds. With debt service payments, future years have expenses exceeding revenues, with the result of a drawing down of the fund balance by FY 27. At that point, either revenue will need to be increased or future projects reduced in scope.

CR&I Fund							
	FY22 Est.	FY23 Plan	FY24 Plan	FY25 Plan	FY26 Plan	FY27 Plan	
TOTAL REVENUE	\$ 3,830,599	\$ 12,898,722	\$ 927,059	\$ 949,536	\$ 945,766	\$ 972,760	
TOTAL EXPENSE	\$ 5,775,193	\$ 10,313,670	\$ 2,959,819	\$ 1,807,904	\$ 2,066,558	\$ 1,825,763	
Net Revenue / (Expense)	\$ (1,994,153)	\$ 2,585,052	\$ (2,032,760)	\$ (858,368)	\$ (1,120,792)	\$ (853,003)	
Beginning Fund Balance	\$ 3,543,247	\$ 1,549,094	\$ 4,134,146	\$ 2,101,386	\$ 1,243,018	\$ 122,226	
Ending Fund Balance	\$ 1,549,094	\$ 4,134,146	\$ 2,101,386	\$ 1,243,018	\$ 122,226	\$ (730,777)	

Local Motor Fuel Tax Fund (Local MFT)

The Local MFT is used to pay for maintenance programs and smaller transportation projects as funds allow. FY 23 expenses are \$2.1M and the fund balance is projected to fluctuate, ending at \$170,000 in FY 26. Local motor fuel taxes are expected to be roughly \$806,000. The MFT fund is also budgeted to receive \$115,000 in revenue replacement from the ARPA fund via the 'Standard Allowance'. Given the current slate of planned projects, the Local MFT fund balance is projected to be negative by FY 24. However, the Local MFT may receive future 'Standard Allowance' assistance or may benefit from a local motor fuel tax increase.

Local MFT						
	FY22 Est.	FY23 Plan	FY24 Plan	FY25 Plan	FY26 Plan	FY27 Plan
TOTAL REVENUE	\$789,892	\$921,915	\$826,036	\$849,190	\$873,817	\$899,158
TOTAL EXPENSE	\$769,873	\$2,110,715	\$1,465,900	\$905,000	\$625,000	\$965,000
Net Revenue / (Expense)	\$20,019	(\$1,188,800)	(\$639,864)	(\$55,810)	\$248,817	(\$65,842)
Beginning Fund Balance	\$1,488,511	\$1,508,530	\$319,730	(\$320,134)	(\$375,944)	(\$127,127)
Ending Fund Balance	\$1,508,530	\$319,730	(\$320,134)	(\$375,944)	(\$127,127)	(\$192,969)

State Motor Fuel Tax Fund (State MFT)

The State MFT has several revenue sources in the CIP and is projected to be \$2.9M in FY 23, inclusive of the last Rebuild Illinois Capital payment of \$453,000. Future year revenues also contemplate receiving grants for two major projects, Florida Avenue from Wright Street to Hillcrest Avenue in FY 25 and Lincoln Avenue from Green Street to Florida Avenue in FY 26. If the City does not secure these grants, implementation of the projects would be delayed, or come at the expense of other projects. The fund balance is high at the beginning of the CIP and gradually reduced through FY 26.

State MFT						
	FY22 Est.	FY23 Plan	FY24 Plan	FY25 Plan	FY26 Plan	FY27 Plan
TOTAL REVENUE	\$2,191,423	\$2,936,263	\$1,676,285	\$12,731,021	\$6,164,592	\$1,825,624

Net Revenue / (Expense)	(\$1,199,363)	(\$3,972,642)	\$306,285	(\$671,029)	\$419,592	\$8,124
Beginning Fund Balance	\$5,452,407	\$4,253,044	\$280,401	\$586,686	(\$84,343)	\$335,249
Ending Fund Balance	\$4,253,044	\$280,401	\$586,686	(\$84,343)	\$335,249	\$343,373

Stormwater Utility Fund

In addition to annual programmatic expenses such as cleaning, televising and spot repairs, the Stormwater Utility Fund has planned projects for improvements at Boneyard Creek Crossing and Phillips Rec Center. The Stormwater Master Plan and supplemental GIS data work is expected to inform project prioritization going forward. As currently planned, the fund's revenues are stable and are \$1.9M in FY 23. Expenses range between \$1.7M and \$2.5M. The fund balance begins and ends over \$1M.

Stormwater Utility						
	FY22 Est.	FY23 Plan	FY24 Plan	FY25 Plan	FY26 Plan	FY27 Plan
TOTAL REVENUE	\$1,831,534	\$1,906,418	\$1,959,744	\$2,021,085	\$2,084,287	\$2,130,633
TOTAL EXPENSE	\$2,092,260	\$2,575,458	\$2,089,515	\$1,706,241	\$2,454,230	\$1,732,838
Net Revenue / (Expense)	(\$260,726)	(\$669,040)	(\$129,771)	\$314,844	(\$369,943)	\$397,795

Ending Fund Balance	\$1,662,046	\$993,006	\$863,235	\$1,178,079	\$808,136	\$1,205,931

Sanitary Sewer Fund

Like the Stormwater Utility Fund, much of the Sanitary Sewer Fund's major expenses include programmatic activity such as cleaning, televising, and repairs. In the upcoming year, staff hopes to further evaluate what the appropriate level of revenues and expense are required. The CIP currently shows fund balance becoming negative by the end of FY 24.

Sanitary Sewer						
	FY22 Est.	FY23 Plan	FY24 Plan	FY25 Plan	FY26 Plan	FY27 Plan
TOTAL REVENUE	\$1,342,344	\$1,495,568	\$1,518,979	\$1,562,186	\$1,607,388	\$1,650,401
TOTAL EXPENSE	\$1,433,146	\$2,587,864	\$1,579,075	\$2,091,796	\$2,136,066	\$1,712,462
Net Revenue / (Expense)	(\$90,802)	(\$1,092,296)	(\$60,096)	(\$529,610)	(\$528,678)	(\$62,061)
Beginning Fund Balance	\$1,222,847	\$1,132,045	\$39,749	(\$20,347)	(\$549,957)	(\$1,078,635)
Ending Fund Balance	\$1,132,045	\$39,749	(\$20,347)	(\$549,957)	(\$1,078,635)	(\$1,140,696)

Looking Ahead

The upcoming year looks to be an intensive planning period. Lights, Signals, & Signs; Sanitary Sewers; and Stormwater Infrastructure will all be working towards creating asset management plans. These plans will also help in the exploration of possible rate increases.

Asset Valuation

Summary

The City of Urbana classifies its capital assets into eight categories. The assets are valued by the total current reconstruction value (CRV). By far, the City's largest asset by valuation is pavement, comprising 44% of the asset value. Together with bridges, lights, signals, and signs, and sidewalks, all transportation-related assets represent 62% of asset value. Sanitary Sewers and Stormwater infrastructure represent 13% and 23% of assets, respectively.

Figure 1. Percentage of Current Reconstruction Value by Asset Class

To get CRV estimates, the assets are valued using rough metrics that rely heavily on assumptions. For example, the CRV for Road Pavement was calculated by taking the square yards of pavement multiplied by regional averages for reconstruction by type of pavement. This is a rudimentary valuation, but provides a workable estimate. In general, CRV provides a straightforward estimate that is easy to calculate. The tradeoff with this method is that it does not reflect all of the nuances that affect depreciation of assets. A more robust method of valuation, such as life cycle assessment requires more time, expertise, cost, and data than currently available. The City is working on a number of asset management plans that will be useful in refining these estimates in the future. Relatedly, given that valuations are for the reconstruction value, infrastructure can also be thought of as a liability for the City, given that they represent future expenses that the City will need to incur.

Figure 2. 2020 Estimates for City-Owned Asset Valuations

ASSET CLASS	ASSET COMPONENT	ESTIMATED AVERAGE UNIT PRICE	AVERAGE ESTIMATED LIFE EXPECTANCY	TOTAL CURRENT RECONSTRUCTION VALUE (CRV)
Bridges	Bridges and Culverts	\$1 - 2 Million per Bridge	75	\$40,300,000
Facilities	Fire Stations, PW & City Buildings	Between \$5- 20 Million	50	\$43,200,000
Lights, Signals, & Signs	Controllers, Mast Arms, Poles, Wire	\$6,000/Light Pole & \$140,000 /Signalized Intersection	40	\$49,800,000
Pavement	Concrete, Asphalt, treated & Brick Streets	\$160-180/square yard	60	\$445,500,000
Sidewalks/Paths	Sidewalks & Bike/Multi-use Paths	\$12/square foot	100	\$50,000,000
Sanitary Sewers	Sewer Pipes	\$250/foot	100	\$136,600,000
Stormwater Facilities	Sewer Pipes & Pumping Station	\$310/foot	100	\$239,600,000
Arbor/Canopy	Parkway Trees	\$2,000/mature tree	60	\$21,400,000
Total Current Reconstruction Value:				\$1,026,400,000

Capital Replacement and Investment

Capital Replacement and Investment (CR&I) Spending Target

By using the asset valuation and average lifecycle, a baseline target for anticipated capital replacement and investment expenditures can be calculated. For the 2022 CIP, the CRV was also adjusted based on the Construction Cost Index, which was 21% in 2021. On the whole, the City of Urbana would need to commit \$17.7M a year on CR&I to replace its infrastructure with in-kind quality replacement in order to maintain current conditions.

Figure 3. Estimated Annual CR&I Cost to Maintain Infrastructure Quality

ASSET CLASS	2020 RECON. VALUE ESTIMATES (CRV)	TOTAL CURRENT RECONSTRUCTION VALUE (CRV) ¹	Annual CR&I Target
Bridges	\$40,300,000	\$50,000,000	\$666,667
Facilities	\$43,200,000	\$50,000,000	\$1,000,000
Lights, Signals, & Signs	\$49,800,000	\$60,000,000	\$1,500,000
Road Pavement	\$445,500,000	\$540,000,000	\$9,000,000
Sidewalks and Pathways	\$50,000,000	\$60,000,000	\$600,000
Sanitary Sewers	\$136,600,000	\$165,000,000	\$1,650,000
Stormwater Facilities	\$239,600,000	\$290,000,000	\$2,900,000
Arbor/Canopy	\$21,400,000	\$25,000,000	\$416,667
Totals	\$1,026,400,000	\$1,240,000,000	\$17,733,333

1. 2020 values were adjusted for inflation using 2021-construction cost index and rounded to reflect lower precision. Detailed calculations for 'City-Owned Assets and Valuations' reviewed on a multiyear cycle.

The \$17.7M figure represents a best-case scenario, where that amount has been accrued annually as a reserve for future replacement. In practice, Urbana has habitually under-committed funds for future capital replacement. To illustrate this point, if the City had been accruing reserves for future facilities projects since the most recent capital investments in these assets, the City would have \$21M in reserved funds to undertake the Facility Master Plan. Instead, the City will need to borrow funds and is only proposing to spend \$12M in Facility capital improvements at this time, suggesting that the average quality of our facility assets will continue to decline over time.

Capital Replacement and Investment in CIP

Urbana will not meet this level of desired investment, since the City only averages \$11.5M in capital investment over the life of the CIP, inclusive of over \$14 million in prospective grants. This will ultimately lead to using assets beyond their life expectancy, deteriorating conditions, and higher operating and maintenance costs.

Figure 4. Capital Replacement Investment Expenditures in CIP

Asset Class	FY23 Budget	FY24 Plan	FY25 Plan	FY26 Plan	FY27 Plan	Average
Bridges	\$707,000	\$280,000	\$0	\$160,000	\$880,000	\$405,400
Facilities	\$8,527,149	\$1,479,816	\$1,479,491	\$1,479,490	\$1,479,791	\$2,889,147
Lights, Signals, & Signs	\$1,270,000	\$1,100,000	\$0	\$250,000	\$0	\$524,000
Road Pavement	\$7,791,966	\$2,010,900	\$13,739,550	\$5,665,000	\$1,335,000	\$6,108,483
Sidewalks and Pathways	\$1,100,000	\$200,000	\$200,000	\$200,000	\$200,000	\$380,000
Sanitary Sewers	\$1,158,250	\$249,018	\$725,763	\$733,193	\$271,317	\$627,508
Stormwater Facilities	\$810,000	\$655,800	\$281,768	\$937,909	\$224,229	\$581,941
Arbor/Canopy	\$0	\$0	\$0	\$0	\$0	\$0
Total CR&I Spending	\$21,364,365	\$5,975,534	\$16,426,572	\$9,425,592	\$4,390,337	\$11,516,480

Operation and Maintenance

Operation and Maintenance (O&M) Spending Target

In addition to replacement at the end of an asset's life-cycle, there are also interim operational and maintenance activities that are required to maintain functional condition and life expectancy of an asset. For example, while a road may not need a total replacement for 60 years, over its life there will be ongoing O&M costs of pot-hole filling, crack sealing, pavement patching, etc. that are still required to achieve the desired life expectancy. Figure 5 below outlines a rudimentary calculation for establishing a baseline O&M spending target. While there is likely more gradation in the maintenance requirements than currently used in the calculations below, the varied type of assets within a class, local nuances, and past deferred maintenance make further refinement more complicated. Further refinement is not expected to provide greater insight since the target figures are representational and would still reflect broad-based averages and assumptions.

Figure 5. Estimated Annual O&M Cost to Maintain Asset Life Expectancy

ASSET CLASS	TOTAL CURRENT RECONSTRUCTION VALUE (CRV) ²	ESTIMATED OPERATION AND MAINTENANCE REQUIREMENT	Annual O&M
Bridges	\$50,000,000	1.0%	\$500,000
Facilities	\$50,000,000	1.0%	\$500,000
Lights, Signals, & Signs	\$60,000,000	1.0%	\$600,000
Road Pavement	\$540,000,000	1.0%	\$5,400,000
Sidewalks and Pathways	\$60,000,000	1.0%	\$600,000
Sanitary Sewers	\$165,000,000	1.0%	\$1,650,000
Stormwater Facilities	\$290,000,000	1.0%	\$2,900,000
Arbor/Canopy	\$25,000,000	1.0%	\$250,000
Totals	\$1,240,000,000	1.0%	\$12,400,000

2. Using inflation adjusted values from Figure 3.

Operation and Maintenance in CIP

Throughout the CIP, the City spending is below the O&M target, but is generally close to the target, spending an average of \$10.1M a year on O&M for the City's capital assets. While this is close to the hypothetical target, the target does not incorporate past deferred CR&I and maintenance into the funding goal. The result is that the City is not meeting this target on an ongoing basis, which will result in deteriorating conditions and shorter life expectancies.

Figure 6. Operation and Maintenance Expenditures by City

Asset Class	FY23 Budget	FY24 Plan	FY25 Plan	FY26 Plan	FY27 Plan	Average
Bridges	\$128,984	\$109,572	\$135,249	\$116,019	\$141,883	\$126,341
Facilities	\$870,911	\$1,062,093	\$1,092,894	\$1,124,588	\$1,157,201	\$1,061,538
Lights, Signals, & Signs	\$1,517,414	\$1,561,419	\$1,606,700	\$1,653,295	\$1,701,240	\$1,608,014
Road Pavement	\$3,347,346	\$3,587,744	\$3,510,474	\$3,595,602	\$3,683,200	\$3,544,873
Sidewalks and Pathways	\$315,119	\$241,937	\$248,953	\$256,173	\$263,601	\$265,157
Sanitary Sewers	\$1,429,614	\$1,330,057	\$1,366,033	\$1,402,873	\$1,441,145	\$1,393,944
Stormwater Facilities	\$1,785,458	\$1,388,715	\$1,424,473	\$1,516,321	\$1,508,609	\$1,524,715
Arbor/Canopy	\$558,000	\$574,182	\$590,833	\$607,968	\$625,599	\$591,316
Total O &M Spending	\$9,952,845	\$9,855,719	\$9,975,609	\$10,272,839	\$10,522,479	\$10,115,898

Double Jeopardy

Urbana is below the annual targets for both CR&I and O&M investment. For CR&I, the consequence is infrastructure use well beyond our assets' reasonably functional lives to a point of critical failure. The consequences for deferred O&M is quicker deterioration of our assets ultimately resulting in shorter life expectancies. The combination of underfunding both of these together exponentially increases the potential for catastrophic failures; in these instances, our options become

restricted to abandonment, costly, unplanned emergency expenditures, or acceptance and use of ‘failed’ assets.

Revenue Summary

Revenue

Capital replacement and investment and operation and maintenance have diversified revenue streams. Stormwater Facilities and Sanitary Sewers have their own funds that are supported by dedicated taxes and user fees; these fees fund both CR&I and O&M expenses. Transportation projects are funded by a combination of local motor fuel tax, state motor fuel tax, and state/federal transportation grants. Large transportation capital projects are primarily directed to road pavement but often include other assets in the right-of-way. Motor fuel and transportation grants generally have restrictions on what they can be used for and can have extensive documentation requirements.

The remaining funds for CIP projects come from the City of Urbana General Fund. O&M expenses such as staff time, vehicles, engineering, upkeep, etc. for each asset are typically part of the Public Works Department and are included in the annual budget. The General Fund also transfers money to the CR&I Fund (Fund 200), which can be used on specific capital projects or programs.

Over the long term, the average amount of revenue equals the average amount of expenditures. In the short term, there is variation based on project timing, grants, and fund balance. Each revenue stream has its own respective long term outlook.

Motor Fuel Taxes

Revenue for Local MFT comes from the local gas tax ordinance, last updated July 1, 2011. Funds are used for transportation capital projects and maintenance. State MFT come from three individual sources: state motor fuel tax, the transportation renewal fund, and the Rebuild Illinois capital program. The City will receive of Rebuild Illinois funds of \$453,000 in FY 23, the last year of the program.

In the past few years, the MFT funds have been negatively impacted by the pandemic and the resulting implications. Previous years accrued less revenue compared to pre-pandemic expectations and the long-term impact of a lower Census count is a reduction in revenue of \$115,000 per year. Furthermore, future year revenue estimates are less certain due to the increasing size of the electric vehicle market. In recent years, comparable metropolitan areas, like Danville and Bloomington-Normal have increased their local gas taxes to help close the funding gap for transportation needs; all of their rates are currently 1.6 to 1.8 times Urbana’s current rate of \$0.05/gallon. Similar to the local gas tax increases, in 2019, the State of Illinois implemented a substantial adjustment by doubling its base gas tax rate from \$0.19/gallon to \$0.38/gallon. The City should seriously consider reviewing and adjusting its local gas tax in the coming fiscal year with an overwhelming amount of unfunded transportation improvement needs.

Grants

Grants are highly volatile and unpredictable. The proposed CIP assumes that the City will receive grants for two major projects: Florida Avenue (Wright Street to Hillcrest Street) and Lincoln Avenue (Green Street to Florida Avenue). The projects that may receive grants are high priority projects. If

the City does not receive these grants, the projects are still likely to occur, but on a delayed schedule, reduced in scope, and at the cost of other potential projects.

Bond Issuance

The CIP incorporates \$12M of debt issuance for implementation of Facility Master Plan projects. Currently, the City is nearly debt free; the Windsor Road Reconstruction debt will retire in FY 24. The lack of debt provides the City the fiscal flexibility to issue significant amount of debt to meet its infrastructure needs. Neighboring central Illinois communities have general obligation debts between \$48M and \$166M, or between \$550 and \$1,900 per capita. The proposed \$12M in debt for Urbana would equate to \$313 per capita.

Sewer Benefit Tax

The Sanitary Sewer Fund derives its revenue from the sewer tax, which is reserved for sewer improvements and is stable. Planning and GIS improvements along with an enhanced cleaning, inspection, and review program being implemented in FY 2023 should better identify sanitary sewer needs.

Stormwater Utility Fee

The Stormwater Utility Fund derives its revenue from the stormwater utility fee, which is reserved for storm sewers and stormwater-related improvements and is stable. Completion of the Stormwater Management Plan, other planning and GIS improvements, and an enhanced cleaning, inspection, and review program being implemented in FY 23 will help the City better identify needs.

General Fund

In addition to O&M expenses paid directly out of the General Fund, the CR&I Fund is replenished by transfers from the General Fund. The CR&I Fund supports transportation projects, facilities projects, and other capital projects that may require unrestricted funds. Historically, the amount of transfers has fluctuated. In FY 22 there was a one-time increase of \$2,000,000 to fund Equity and Quality of Life projects. Towards the later years of the 5-Year CIP, the General Fund will need allocate additional funds for capital projects in order to support ongoing debt service payments.

Figure 7. Revenue Sources for Capital Improvements

Asset Class	FY23 Budget	FY24 Plan	FY25 Plan	FY26 Plan	FY27 Plan	Average
General Fund Operations	\$5,939,693	\$6,111,944	\$6,289,190	\$6,471,577	\$6,659,253	\$6,294,331
Unrestricted CR&I ³	\$12,898,722	\$927,059	\$949,536	\$945,766	\$972,760	\$3,338,769
Motor Fuel Taxes	\$3,101,378	\$2,502,321	\$2,580,211	\$2,638,409	\$2,724,782	\$2,709,420
Grants	\$956,800	\$200,000	\$11,200,000	\$4,600,000	\$0	\$3,391,360
Sanitary Sewers	\$1,493,911	\$1,518,979	\$1,562,186	\$1,607,388	\$1,650,401	\$1,566,573
Stormwater Facilities	\$1,906,418	\$1,959,744	\$2,021,085	\$2,084,287	\$2,130,633	\$2,020,433
Total Revenue	\$26,296,921	\$13,220,047	\$24,602,208	\$18,347,427	\$14,137,829	\$19,320,887

3. Includes \$12M in General Obligation Bond Revenue.

Funding Gap Analysis

Funding Gaps

A quick comparison of funding targets and current revenues shows that current revenues are substantially less than the funding targets for CR&I or O&M. In the long term, this will lead to a deterioration of the average asset condition and shortening of life expectancy. Altogether, current revenues are approximately \$13.7M less than the total combined funding target of \$30M.

Figure 8. Funding Gaps

Asset Class	CR&I Target	O&M Target	Total Target	Revenue (<i>Less Debt, Grants Averaged</i>)	Annual Funding Gap	Revenue Source
Major Road	\$9,000,000	\$5,400,000	\$14,400,000	\$8,794,994	(\$5,605,006)	MFT taxes
Other/Unrestricted.	\$4,183,333	\$2,450,000	\$6,633,333	\$4,016,851	(\$2,616,482)	Misc Taxes.
Sanitary Sewer	\$1,650,000	\$1,650,000	\$3,300,000	\$1,566,573	(\$1,733,427)	Benefit Tax
Stormwater	\$2,900,000	\$2,900,000	\$5,800,000	\$2,020,433	(\$3,779,567)	User Fee
Total	\$17,733,333	\$12,400,000	\$30,133,333	\$16,398,851	(\$13,734,482)	

Sustainable Rates

It should be noted again, that the asset valuations and funding targets are developed using benchmark industry standards, which have an inherent degree of imprecision. However, this analysis can be used to begin to identify what new, sustainable tax rates are needed in order for revenue to sufficiently fund the targeted amount of expenditures. For a hypothetical two-car, two-and-a-half person, single-family household, the projected effect would be an increase in taxes and fees of \$410/year. In the upcoming fiscal year, staff plan on exploring this issue in more detail to inform a discussion of sustainable tax rates for the local motor fuel tax, stormwater utility fee, and sewer benefit fee.

Figure 9. Hypothetical/Illustrative Sustainable Rates

Asset Class	Current Rate	Needed Rate Increase	New Rate	Average Annual New Revenue/User	Calculations Notes
Pavement/Major Road	\$0.05	64%	\$0.09	\$26	Per Driver (650 a year)
Other/Unrestricted.		7%	\$0.00	\$68	Total GF Revenue, Per 2.5 person household
Sanitary Sewer	\$0.15	111%	\$0.32	\$62	Rate per 100, assume 100 per day per household
Stormwater	\$5.60	187%	\$16.08	\$126	Per single-family home (year)
Total				\$410	Per household

Bridges

Description: Bridges and Box Culverts in the City of Urbana used either for pedestrian or vehicular traffic and stormwater conveyance.

Asset Summary Table		
Quantity	25	Bridges
Value	\$40,300,000	Replacement Value (2020)
Life Expectancy	75	Years
Capital Replacement and Investment		
Target CR&I / Year	\$666,667	Straight Line Depreciation
Target CR&I /CIP	\$3,333,333	5-Year CIP
CIP Planned CR&I	\$ 2,063,500	
Deferred CR&I in CIP	(\$1,269,833)	
Operations and Maintenance Cost		
Annual O&M Target	\$500,000	Rudimentary 1%
Current Annual Maintenance Cost	\$128,984	
Annual Deficit	\$371,016	

Notes: Washington Street Bridge was load restricted to 12 tons and added in FY 23 as an emergency repair as it is currently causing MTD buses and other heavy vehicles to reroute. Annual bridge inspection and maintenance programs have been added to CIP to better identify and anticipate future bridgework needs.

Asset Plan Documents: [Bridge Survey](#)

Public Facilities

Description: Public facilities: four fire stations, pump house, LRC, City Building, Civic Center, Public Works buildings, storage shed, and landfill.

Asset Summary Table		
Quantity	12	Major Public Facilities
Value	\$43,200,000	Replacement Value
Life Expectancy	50	Years
Capital Replacement and Investment		
Target CR&I / Year	\$1,000,000	Straight Line Depreciation
Target CR&I / CIP	\$5,000,000	5-Year CIP,
CIP Planned CR&I	\$19,753,425	Debt Payments
Deferred CR&I in CIP	\$14,753,425	Implementing Facilities Plan
Operations and Maintenance Cost		
Annual O&M Target	\$500,000	Rudimentary 1%
Current Annual Maintenance Cost	\$870,911	EST. using operations data
Annual Deficit	\$ (370,911)	O&M costs includes utilities and other incidentals

All Asset Value

Notes: The City is implementing the vast majority of the Facilities Master Plan. Most of the facility improvements will begin in FY 23 and be funded with debt financing. The surplus capital spending in the CIP reflects years of deferred investment. After the completion of the plan, most facilities would not need major CR&I improvements for several years, with the possible exception of a City Building expansion. Since facilities improvements are occurring in rapid succession, it is important to understand the limitations of the straight line depreciation on replacement value for financial planning. The CR&I expenditures reflect annual debt service payments as they occur.

Asset Plan Documents: [Facilities Master Plan](#)

Lights, Signals, Signs

Description: 48 traffic signal controllers, 96 traffic signal mast arms, 96 traffic signal poles, 98 street light controllers, 4,073 street light poles/luminaires, 512,181 feet of conduit and wiring and 4,516 signs.

Asset Summary Table		
Quantity	4,073	Light Poles
Value	\$ 49,810,000	Replacement Value
Life Expectancy	40	Years
Capital Replacement and Investment		
Target CR&I / Year	\$1,500,000	Straight Line Depreciation
Target CR&I / CIP	\$7,500,000	5-Year CIP
CIP Planned CR&I	\$2,620,000	(some work included in Projects)
Deferred CR&I in CIP	(\$4,880,000)	
Operations and Maintenance Cost		
Annual O&M Target	\$600,000	Rudimentary 1%
Current Annual Maintenance Cost	\$1,517,414	EST. using operations budget
Annual Deficit	\$(917,414)	(surplus due to past deferrals)

All Asset Value

Notes: Goal in this CIP is to develop long-term proactive maintenance and capital investment strategies. FY 22 Budget has funds set aside to develop a plan for signal replacement and maintenance and the FY 23 Budget earmarks funds for street lighting planning.

Asset Plan Documents: No current plan documents.

Road Pavement

Description: 2,557,508 square yards of pavement.

Asset Summary Table		
Quantity	2,557,508	Square Yards of Pavement
Value	\$445,500,000	Replacement Value
Life Expectancy	60	Years
Capital Replacement and Investment		
Target CR&I / Year	\$9,000,000	Straight Line Depreciation
Target CR&I / CIP	\$45,000,000	5-Year CIP
CIP Planned CR&I	\$ 30,542,416	
Deferred CR&I in CIP	\$(14,457,584)	
Operations and Maintenance Cost		
Annual O&M Target	\$5,400,000	Rudimentary 1%
Current Annual Maintenance Cost	\$3,347,346	EST. using operations data
Annual Deficit	\$2,052,654	

All Asset Value

Notes: The City recently completed its pavement condition assessment and is using that to scope and prioritize transportation capital improvement projects. More detail on the transportation prioritization method can be seen in the Transportation Project Book section of the CIP. Regarding life expectancy, 60 years is the estimated best case scenario right now; for reference IDOT benchmarks roads at a 45-year life expectancy. Currently, the construction standards in City code allow for roads that may not last beyond 20 years, a problem the City is currently experiencing with several subdivision built in the early 2000's, including the Savannah Green area, which is slated for rehabilitation in FY 23 in the CIP.

Asset Plan Documents: [Pavement Condition Assessment Study](#)

Sidewalk and Paths

Description: 4.1 million square feet of pavement for sidewalks and pathways in the City rights-of-way.

Asset Summary Table		
Quantity	4,165,040	Square feet
Value	\$50,000,000	Replacement Value
Life Expectancy	100	Years
Capital Replacement and Investment		
Target CR&I / Year	\$600,000	Straight Line Depreciation
Target CR&I /CIP	\$3,000,000	5-Year CIP
CIP Planned CR&I	\$1,900,000	Included in other projects
Deferred CR&I in CIP	(\$1,100,000)	
Operations and Maintenance Cost		
Annual O&M Target	\$600,000	Rudimentary 1%
Current Annual Maintenance Cost	\$120,000	Sidewalk and Paths Project
Annual Deficit	\$480,000	

Notes: The Champaign County Regional Planning Commission has a Sidewalk Network Inventory and Assessment. This has not been translated to an annual CR&I implementation plan but staff is working on it. The CIP includes CDBG funds for sidewalk projects. While there are not typically sidewalk specific CR&I projects in the CIP, sidewalks and paths are typically improved in large transportation projects. FY 23 figures include an estimate for the Equity and Quality of Life (EQL) project based off the types of projects submitted; figures may change as EQL funding is allocated.

Asset Plan Documents: [RPC Sidewalk Inventory](#)

Sanitary Sewers

Description: 542,208 feet of pipe (102 miles) of various diameters as well as 2,315 manholes.

Asset Summary Table		
Quantity	542,208	Feet of Pipe
Value	\$136,600,000	Replacement Value
Life Expectancy	100	Years
Capital Replacement and Investment		
Target CR&I / Year	\$1,650,000	Straight Line Depreciation
Target CR&I /CIP	\$8,250,000	5-Year CIP
CIP Planned CR&I	\$3,137,541	
Deferred CR&I in CIP	(\$5,112,459)	
Operations and Maintenance Cost		
Annual O&M Target	\$1,650,000	Rudimentary 1%
Current Annual Maintenance Cost	\$1,168,146	EST. using operations data
Annual Deficit	\$481,854	

Notes: The City shares ownership of the sanitary sewer system with the Urbana Champaign Sanitary District, which owns their own pipes and the Wastewater Treatment Plant. The Urbana Sewer Use rate is \$0.1540 per 100 gallons.

Asset Plan Documents: https://www.urbanairillinois.us/Sanitary_Sewer_System

Stormwater Facilities

Description: Stormwater facilities include 763,702 feet (144 miles) of stormwater pipes, wet bottom retention basis, dry bottom detention basins, 8,000 manholes, and the Vine Street pump station.

Asset Summary Table		
Quantity	763,702	Feet of Pipe
Value	\$239,600,000	Replacement Value
Life Expectancy	100	Years
Capital Replacement and Investment		
Target CR&I / Year	\$2,900,000	Straight Line Depreciation
Target CR&I / CIP	\$14,500,000	5-Year CIP
CIP Planned CR&I	\$2,909,706	
Deferred CR&I in CIP	(\$11,590,294)	
Operations and Maintenance Costs		
Annual O&M Target	\$2,900,000	Rudimentary 1%
Current Annual Maintenance Cost	\$1,757,260	using operations data
Annual Deficit	\$1,142,740	

All Asset Value

Stormwater
Facilities
23%

Notes: A Stormwater Management Plan that began in recent years is targeted for completion and implementation in FY 2023. The City implemented a dedicated Stormwater utility fee (\$5.60 per Equivalent Residential Unit (ERU); ERU = 3,100 square feet of impervious area) in 2011 to fund the management of our stormwater facilities and National Pollutant Discharge Elimination System (NPDES MS4) permit compliance.

Asset Plan Documents: Final Stormwater Asset Management Plan forthcoming in FY 2023
https://www.urbanaininois.us/Stormwater_Utility_Fee

Urban Canopy

Description: Parkway trees, in City owned rights-of-way and City-owned properties.

Asset Summary Table		
Quantity	10,935	City Trees
Value	\$21,400,000	Replacement Value
Life Expectancy	60	Years
Capital Replacement and Investment		
Target CR&I / Year	\$416,667	Straight Line Depreciation
Target CR&I / CIP	\$2,083,333	5-Year CIP
CIP Planned CR&I	0	
Deferred CR&I in CIP	(\$2,083,333)	
Operations and Maintenance Costs		
Annual Maintenance Target	\$250,000	Rudimentary 1%
Current Annual Maintenance Cost	\$542,274	EST. using operations data
Annual Deficit	\$ (292,274)	

All Asset Value

Notes: The City has over 10,000 parkway trees planted. In addition to reactive maintenance from wear and weather, trees are proactively trimmed on a multi-year cycle. Ideally, parkway trees should be trimmed on a 7-year cycle; staff time currently allows for maintaining trees on an 11+ year cycle. The annual CR&I figure is the replacement cost of a mature tree. In practice, a 60-year old tree would not be replaced in kind. This figure does not include the cost of adding new trees to vacant sites. It should be noted that planting new trees would come with a corresponding increase in maintenance requirements; without an increase in staff and equipment, the proactive trimming cycle would lengthen, impacting the health of the trees.

Asset Plan: The City is currently reviewing its long-term plans for managing its Urban Canopy. Past practice has been to replace trees as they die. However, this practice, in conjunction with budget constraints, has led to a geographically unequitable distribution of City trees. The City recently received a \$100,000 donation from a private donor to promote a more equitable allocation of street trees.

Transportation Project Prioritization

Prioritization Criteria

Category	Weight
MAJOR SAFETY ISSUES	25%
ROAD CLASSIFICATION	22%
PAVEMENT CONDITION	17%
FUNDING ASSISTANCE	13%
PROJECT LINKING	12%
BUS ROUTE	8%
AGE	3%

Prioritization Process

Potential Projects are generated by a combination of a review of road class, safety issues, and pavement condition from the AP-Tech PAVER information. Generally speaking, at this point only arterial roads or major safety issues result in the creation of proposed projects. Proposed projects are then evaluated on the criteria in the table to the left. The scoring is used as a guideline for inclusion into the CIP. After the initial scoring, non-routine factors such as project cost, timing, subjective analysis, maintenance schedules, cost, and available techniques all enter the discussion.

Prioritization Ranking

PROJECT	INITIAL SCORE	2022 COST ESTIMATE
Projects Selected for Inclusion into CIP		
FLORIDA AVENUE: Wright to Hillcrest	2292	\$ 12,000,000
LINCOLN AVENUE: Florida to Green	1975	\$ 6,250,000
VINE & ILLINOIS: Main to California	1687	\$ 1,000,000
LINCOLN AVENUE: Wascher to Killarney	1597	\$ 2,101,000

40109 - WASHINGTON ST BRIDGE RECONSTRUCTION

Project Description

Replace the existing bridge (Structure Number 010-6134) carrying Washington Street over Sunny Estates Ditch, with a short length of roadway reconstruction. The bridge is located 0.5 mile west of High Cross Road / IL 130.

Project Justification

The existing bridge is in poor condition. It was load rated by IDOT in 2021 and given a weight restriction of 12 tons. This weight restriction requires Champaign-Urbana MTD to reroute their Green and Gray buses through residential streets in the Scottswood Subdivision. The roadway on Washington Street is not a high priority for improvement, so improvements will be limited to replacing the existing bridge.

Changes from Prior CIP

New to CIP.

40148 - SAVANNAH GREEN: ALLEYS & SMITH RD

Project Description

Pavement improvements for Smith Road from Michigan to Florida and all of the alleys in the subdivision.

Project Justification

The current condition of the pavement throughout the subdivision is substandard and deteriorating further, rapidly approaching an unusable state if uncorrected. Smith is the main roadway in the subdivision and is a bus route. The condition and construction type of the alleys make continuing maintenance unsustainable.

Changes from Prior CIP

Timing updated with Planning and Engineering delayed.

40124 - LINCOLN: WASCHER TO KILLARNEY

Project Description

Safety Study and asphalt resurfacing with roadway rehabilitation for Lincoln from Wascher to Killarney.

Project Justification

Lincoln is a major arterial road that needs resurfacing. The safety study is needed as there are several large student apartments on the west side of the street. However, a major bus stop is on the east side of the street and many people cross the street without going to the controlled intersection on Bradley.

Changes from Prior CIP

Moved back one Fiscal Year.

40165 - COUNTRY CLUB RD: EAST OF BRIDGE OVER SALINE

Project Description

Reconstruction of roadway segment owned by City of Urbana, in coordination with replacement of the bridge (Structure Number 010-4150) carrying Country Club Road over Saline Branch Creek, owned by Urbana Township. The City of Urbana segment extends from the east end of the bridge over Saline Branch Creek to Broadway Avenue.

Project Justification

The existing bridge is in poor condition, and the existing curve west of the bridge is hazardous. Urbana Township and Champaign County will pursue federal funding to replace the bridge and improve traffic safety, and these improvements require work on the section of Country Club Road owned by City of Urbana. The City’s segment of Country Club Road is not a high priority for improvement when considered by itself.

40149 - LINCOLN: GREEN TO FLORIDA

Project Description

Roadway reconstruction and safety improvements for Lincoln Avenue between Green and Florida.

Project Justification

This stretch of Lincoln Avenue is a high traffic area, both in terms of vehicle traffic (15,000 ADT) and pedestrian and bicycle traffic to and from the University of Illinois. There have been severe traffic incidents in the past. The intersection of Lincoln and Ohio Street was rated "High" priority in the SCIL report.

40168 - VINE AND ILLINOS

Project Description

Asphalt resurfacing with roadway rehabilitation. Limits of work include Vine Street from Main Street to California Street and Illinois Street from Race Street to Urbana Avenue.

Project Justification

This section of Vine Street scores as a high priority for improvement due to its poor pavement condition, its functional classification as a Minor Arterial, its recent history of above-average crash frequency, its role as a bus route, and the age of the roadway. This section of Illinois Street also scores as a high priority due to its poor pavement condition, its functional classification as a Major Collector, and its role as a bus route. Linking Vine and Illinois into a single project also raised the priority score.

Project Description

Rehabilitation of the existing bridge (Structure Number 010-6109) carrying Coler Avenue over Boneyard Creek, including superstructure replacement, and asphalt resurfacing with roadway rehabilitation from Green Street to Main Street.

Project Justification

The superstructure of the bridge is in poor condition, and it has a weight restriction. Additionally, this section of Coler Avenue scores as a high priority for improvement due to its poor pavement condition, its recent history of above-average crash frequency, and the linking of bridge and roadway improvements in a single project.

Asphalt resurfacing with roadway rehabilitation from Springfield Avenue to University Avenue.

Project Justification

This section of Goodwin Avenue scores as a high priority for improvement due to its poor pavement condition, its functional classification as a Major Collector, and its role as a bus route.

Facilities Master Plan Implementation

Contingent Pathways

City Building
Fire Stations
Public Works
Changes

Implementation Scheduling

The implementation schedule reflects a few key factors. First, the Facilities Master Plan shows that for the facilities below, their condition warrants immediate improvements. Second, there are a few dependent pathways that require implementing certain projects in succession. This is especially relevant for Public Works facilities improvements where people and equipment will be relocated. Third, given that debt financing is required to complete the plan, it is beneficial to complete as many projects as practical concurrently to reduce the time and cost of borrowing.

Facilities Plan Implementation Schedule

Project	FY 22 BUDGET	FY 23 PLAN	FY 24 PLAN
ADA Life Safety Implementation		\$ 90,750	
City-Wide Security Improvements	\$ 220,000		
City Building Interim Reconfiguration	\$ 1,139,000		
Station #2 Design / Build	\$ 278,000	\$ 2,710,400

40803 - ADA LIFE SAFETY IMPROVEMENTS

City of Urbana, Illinois

Health/Life Safety/ADA Report

Volume 1

December 17, 2019

Project Description

Remediation of high priority ADA and health/life safety concerns in City facilities. Most significantly: improvements to fire alarm system coverage at the City Building (400 South Vine) including strobes, horns, and pull stations. Relevant work also includes installation of ADA door actuators, closers, exit signage, and emergency lighting. Primarily City Building. Cost Estimate of \$75,000.

Project Justification

Priority 1 action item identified project in 2019 Phase 1- Facilities Condition Assessment. The City contracted with Bailey Edwards Architecture to perform a full analysis of City facilities. These items were identified as year 1 objectives.

Changes from Prior CIP

Moved to FY 23

40804 - FACILITIES SECURITY IMPROVEMENTS

Project Description

Install card readers linked with door controllers to restrict access. This system will allow for greater flexibility and control over who can access the facility, as well as monitor who has entered the facility. Estimated cost of \$220,000 (50 doors).

Project Justification

Priority 1 action item identified project in 2019 Phase 1- Facilities Condition Assessment. Key Finding #4 from 2020 Phase II- Space and Programming Needs Assessment: Limited delineation between public and private space affects both employee and citizen experience.

40807 - CITY BUILDING RECONFIGURATION

Project Description

Interim renovations to the City Building will include a lobby 'welcome station' that will serve as a first-stop for citizens seeking information or service, and to assist in wayfinding. Also included is new/improved signage and wayfinding. Also considered is a redesign of Police reporting area for situations that are sensitive in nature. Estimated Cost: Design \$142,000 / Construction: \$ 1,139,000.

Project Justification

Key Finding #4 from 2020 Phase II- Space and Programming Needs Assessment: Limited delineation between public and private space affects both employee and citizen experience. Key Finding #3 from 2020 Phase II- Space and Programming Needs Assessment: Unsafe and unenjoyable working conditions impact employee morale. Experience from COVID-19 has also demonstrated a more immediate need.

40805 - NEW FIRE STATION #2

Project Description

New fire station to be constructed across Philo Road from the existing station. Analysis needed to determine scoping of new facility. The target scoping completion date is end of FY 22 or early FY23. New station will ideally be a 3-bay drive-through Estimated Cost: Design- \$278,000 / Construction: \$2,741,400 based on replacement in-kind. A larger station anticipated to increase costs post scoping.

Project Justification

Identified as at-risk prioritized facility in 2019 Phase 1- Facilities Condition Assessment. This facility is rated with a Facilities Condition Index of poor. Key Finding #3 from 2020 Phase II- Space and Programming Needs Assessment: Unsafe and unenjoyable working conditions impact employee morale.

40808 - NEW STORAGE FACILITY

Project Description

Located at existing Public Works site. Construction underway of a facility with dedicated space for multiple City departments will act as a centralized, organized space for storage of vehicle fleets, trailers, and related equipment. Also incorporated in the concept is an area for long-term document and file storage. This facility will be secured with restricted access. Estimated Cost \$2,100,000.

Project Justification

Key Finding #5 from 2020 Phase II- Space and Programming Needs Assessment: Poorly maintained storage causes the work environment to feel crowded. This will allow for the repurposing of the existing storage facility (704 Glover) for City Fleet maintenance.

Changes from Prior CIP

Size decreased in FY 22 in order to meet existing budget and take advantage of purchasing opportunity. Additional funds needed in FY 23 to up-fit storage space.

Critical Milestones

TBD

40814 - CITY BUILDING ADDITION

Project Description

Major renovations within the City Building will reprogram entire space and enable most staff workspaces to be on floors 1-2, storage spaces will be relocated to the basement, departments will be co-located between 2 floors with less subdivided spaces (e.g. open workspaces, fewer private offices, shared amenity spaces). Project considers a new building addition to accommodate new public service and City Council chambers space built adjacent to the existing Council Chambers space. Estimated Cost: Design \$2,202,000/ Construction: \$ 17,620,000 (2020 cost figures not adjusted for inflation).

Project Justification

Recommendation in alignment with Key Findings #1-#5 from 2020 Phase II- Space and Programming Needs Assessment.

Changes from Prior CIP

To be incorporated in CIP as funds and project priorities allow.

Associated Master Plan

Facilities Master Plan

Neighborhood(s)

Downtown

Critical Milestones

TBD - dependent on debt service schedule from other facilities projects.

40815 - NEW FIRE STATION #1

Project Description

Fire Station #1 potentially relocates out of the City Building to a new TBD location. The scope of the City Building Major Reconstruction + Building Addition would be altered such that out of City Building, a new addition to the City Building could be added to the east (rear) of current Fire Station #1 structure. In this scenario, City Council Chambers could relocate into new addition space, and space formerly occupied by Council Chambers could be renovated into a city-wide training and support space. Estimated Cost: Design \$1,275,000/Construction: \$ 1,913,000 (2020 cost figures not adjusted for inflation).

Project Justification

Key Finding #3 from 2020 Phase II- Space and Programming Needs Assessment: Unsafe and unenjoyable working conditions impact employee morale. Key Finding #5 from 2020 Phase II- Space and Programming Needs Assessment: Poorly maintained storage crowds the work environment. This project is to be considered as an option in the City Building Major Reconstruction+ Building addition project planning and is dependent upon funding strategies. In the absence of this project, facilities concerns will be prioritized by the Facilities Conditions Assessment recommendation and funded through General Facilities Rehabilitation project.

Changes from Prior CIP

To be incorporated in CIP as funds and project priorities allow.

Associated Master Plan

Facilities Master Plan

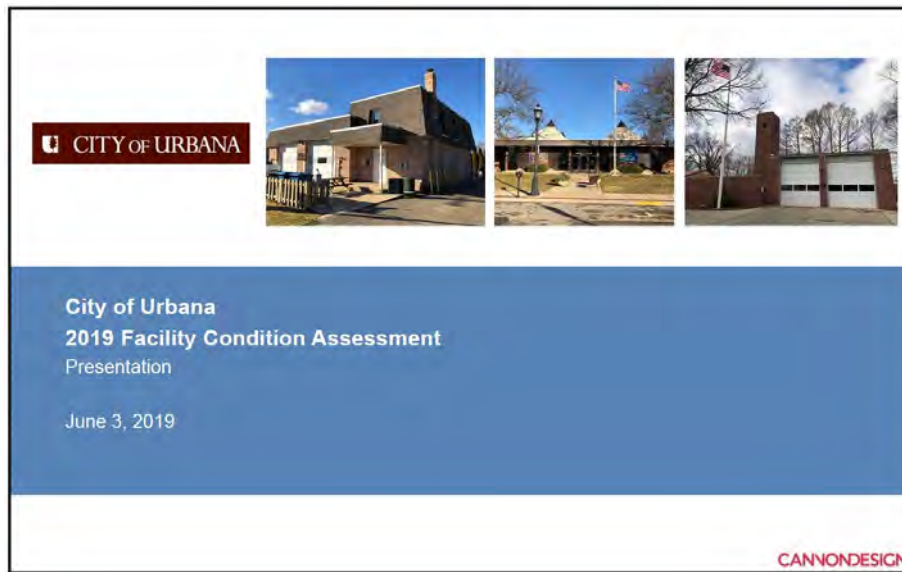

Neighborhood(s)

Downtown

Critical Milestones

TBD - Dependent on debt service schedule of other facilities projects.

40802 - GENERAL REHAB

Project Description

Discretionary funding for small/medium scope facilities projects.

Project Justification

Projects to be identified and prioritized from findings of 2019 Phase 1- Facilities Condition Assessment. Funds will be focused to areas identified not to receive rehabilitation in near term capital improvement planning and for emergency facility conditions.

Changes from Prior CIP

FY 23 budget adjusted for inflation with anticipated inflation reflected in future years.

Associated Master Plan

40401 - BRIDGE MAINTENANCE PROJECTS

Project Description

Bank Stabilization for Perkins Road over Tributary to Saline Branch (SN 010-4272). Restore west bank of creek at bridge with stone riprap. Concrete Deck Sealing. Clean bare concrete decks and apply a penetrating sealant. Locations include Lincoln Avenue over Saline Branch Creek South (SN 010-4541), Olympian Drive over Illinois Central Railroad (SN 010-4556), Lincoln Avenue over Saline Branch Creek North (SN 010-6130), Race Street over Boneyard Creek (SN 010-6136), and High Cross Road Pedestrian Bridge over St. Joseph Drainage Ditch (SN 010-PED12). Pier Repairs for Broadway Avenue over Saline Branch Creek (SN 010-6128). Protect metal shell piles from further corrosion and repair pier caps.

Project Justification

The west bank at the Perkins Road bridge is significantly scoured. The bank should be restored and stabilized before the scour undermines the bridge foundation. Sealing bare concrete decks every five years reduces the amount of chlorides and moisture that penetrate the deck and superstructure and would deteriorate reinforcement and structural steel. The metal shell piles on the Broadway Avenue bridge are heavily corroded, and new corrosion protection, such as concrete encasement, should be constructed. The piles have reinforced concrete cores, so the corrosion of the metal shell is not affecting the load carrying capacity.

Changes from Prior CIP

Previously used this account for bridge inspections. State MFT funds will now be used for bridge inspections and Stormwater Utility Fund will pay for small bridge maintenance projects.

40416 - Vine Street Pump Station Communication System

Project Description

Upgrade the communication systems for the existing pump station located where Boneyard Creek crosses under Vine Street, south of University Avenue.

Project Justification

The existing pump station is critical for conveying stormwater drainage on Vine St. at this low point without allowing water on Vine Street pavement. Currently, the pump controls have no functioning communication system to alert the City of pump failures or other warnings. The objective of this project is to install a communication system that provides real-time alerts and allows for rapid response to maintain functionality of the roadway.

40414 - BONEYARD CREEK CROSSING IMPROVEMENTS

Project Description

Various repairs and improvements to the existing infrastructure at Boneyard Creek Crossing, located along Boneyard Creek from Griggs Street to Broadway Avenue. Electrical work includes repairs to existing lights and expansion of electrical facilities to accommodate events and activities. Boneyard Creek maintenance work includes bank stabilization on the north bank between Race Street and Broadway Avenue, and sediment control measures to mitigate deposition on the pedestrian paths along the creek. Bridge repairs at Race Street over Boneyard Creek (SN 010-6136) include repairing stone masonry attached to the substructure and repairing sidewalk on top of the bridge. Site work includes surface drainage improvements and repairs to an existing soil bag retaining wall. Projects 40167/40169 are a component of the Boneyard Creek Crossing Improvements.

Project Justification

Boneyard Creek Crossing was constructed in 2014 at a cost of \$8 million. The north bank of Boneyard Creek, west of Broadway Avenue, is eroding and requires stabilization. The City desires to increase and improve the utilization of Boneyard Creek Crossing for events and activities by expanding electrical facilities and mitigating sediment deposition on pedestrian pathways along the creek. Concurrent with these improvements, repairs can be made to the Race Street bridge and to other site features to maintain Boneyard Creek Crossing in good condition.

40415 - PHILLIPS REC CENTER CREEK DAYLIGHT

Project Description

In partnership with the Urbana Park District, daylight Boneyard Creek across the Phillips Recreation Center property, from Springfield Avenue to McCullough Street, by partial or complete removal of the existing bridge and culvert structures (SN 010-6111). Includes site improvements to maintain pedestrian access over the creek. The Urbana Park District owns the Phillips Recreation Center property, and the City of Urbana maintains the Boneyard Creek waterway. Feasibility and scoping study in FY 23 to better inform long-term decisions for this structure.

Project Justification

The existing bridge and culvert structures are in poor condition. Daylighting the creek rather than replacing the existing structures would result in lower life cycle costs for this segment of Boneyard Creek, and provide an opportunity for beautification at this site.

40512 - SANITARY SEWER RECONSTRUCTION EXTENSIONS

Project Description

Reconstruction and extension of sanitary sewers.

Project Justification

Reconstruction of obsolete sanitary sewers and extension of public sanitary sewers with special circumstances.

A more detailed plan in development for FY 23.

Changes from Prior CIP

New

Associated Master Plan

Neighborhood(s)

City-wide

Critical Milestones

Begin developing replacement plan in FY 22
