

Save Money and Support Clean Energy. No Rooftop Panels Required.

Urbana Community Solar allows qualified Ameren utility customers to subscribe to a local solar farm and save up to 50% on their annual electricity supply charge* without having to install solar panels.

1 Subscribe to a local Nexamp solar farm

2 Support clean, solar energy on your utility grid

3 Receive credits on your utility bill and save on your electricity cost

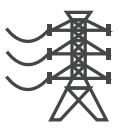

THE BENEFITS:

Save up to 50% on your annual electricity supply charge.*

No installation of any equipment on your roof or property.

Your utility will stay the same with no interruptions to your service.

No upfront costs or long-term contracts that lock you in for years.

Support solar power and demonstrate your commitment to renewable energy

No credit check.

*Discount applies to the Ameren Purchased Electricity Supply Charge only, not to transmission or delivery fees.

Illinois Solar for All

FREQUENTLY ASKED QUESTIONS

Am I eligible to enroll?

You are eligible to subscribe to the Urbana Community Solar project if you pay an Ameren electric bill and if you either (a) live in a HUD qualified census tract and provide an income affidavit, (b) participate in a third-party qualifying program such as LIHEAP, Medicaid or SNAP, or (c) provide a tax transcript that shows your household earns less than the maximum income level.

How is my solar allocation determined?

As part of the subscription process, you will provide your latest Ameren bill so that we can analyze your monthly electricity usage. We use this information to allocate a share of the solar farm that should earn you enough credits to offset nearly all of your annual electricity supply charges.

Am I guaranteed a discount for a specified period of time?

You are guaranteed the same 50% discount on your credits for 15 years. However, you may cancel your contract at any time without penalty. It may take up to 90 days for the cancellation to go into effect.

Is there a penalty for canceling my subscription?

No. There are no penalties or termination fees. Should you choose to leave the program, it may take up to 90 days for the cancellation to go into effect.

Do I get two bills?

Yes. Nexamp (the company that owns the Urbana Solar project) will send you a monthly bill for your share of the solar farm, and you'll continue to receive your regular electricity bill, minus your earned credits. You can sign up for automatic bill pay, which can eliminate any extra work.

Does this mean I no longer receive power from my local utility?

No. Your power will still be delivered to your home by the same utility company, Ameren; Nexamp will just feed energy into the Ameren utility grid. If there's ever a problem or outage, you'll get the exact same service from the exact same people at Ameren.

Do I have to switch my energy supplier?

If you are purchasing power through a municipal or county aggregation program, a third-party energy supplier, or alternative retail electric supply, we strongly encourage you to opt out of these programs before the community solar farm completes construction and is turned on. This is to maximize your potential savings and ensure your 50% discount with community solar.
