RE: Plans for Proposed Roadway Lighting Improvements

Dear Residents, Businesses, and University Faculty, Staff and Students:

This letter is to inform you that new street lighting is planned for Illinois Street, Gregory Street, and Oregon Street and is scheduled to start later this spring. The project is expected to end in late October 2017. The new streetlights will resemble the streetlights currently on Goodwin Avenue adjacent to the Krannert Center for the performing Arts except the lamp will be a LED lamp instead of a metal halide lamp as is installed on Goodwin Avenue. This project is 100% funded with City of Urbana funds coming from the Motor Vehicle Parking System Fund.

The proposed improvements consist of roadway lighting removal and replacement, installation of underground conduit and cables and other incidental work. The proposed roadway lighting improvements are located along Oregon Street from Mathews Avenue to Lincoln Avenue, Gregory Street from Oregon Street to Illinois Street, and Illinois Street from Goodwin Avenue to Lincoln Avenue in the City of Urbana. The City of Urbana will oversee the construction of this project, which is presently being competitively bid.

The contractor (yet to be determined) on this project shall maintain pedestrian access along the project corridor although sidewalk segments may be temporarily closed and pedestrians routed to a sidewalk on the opposite side of the street.. Closing of entrance/exit to the adjacent properties is expected to be minimal.

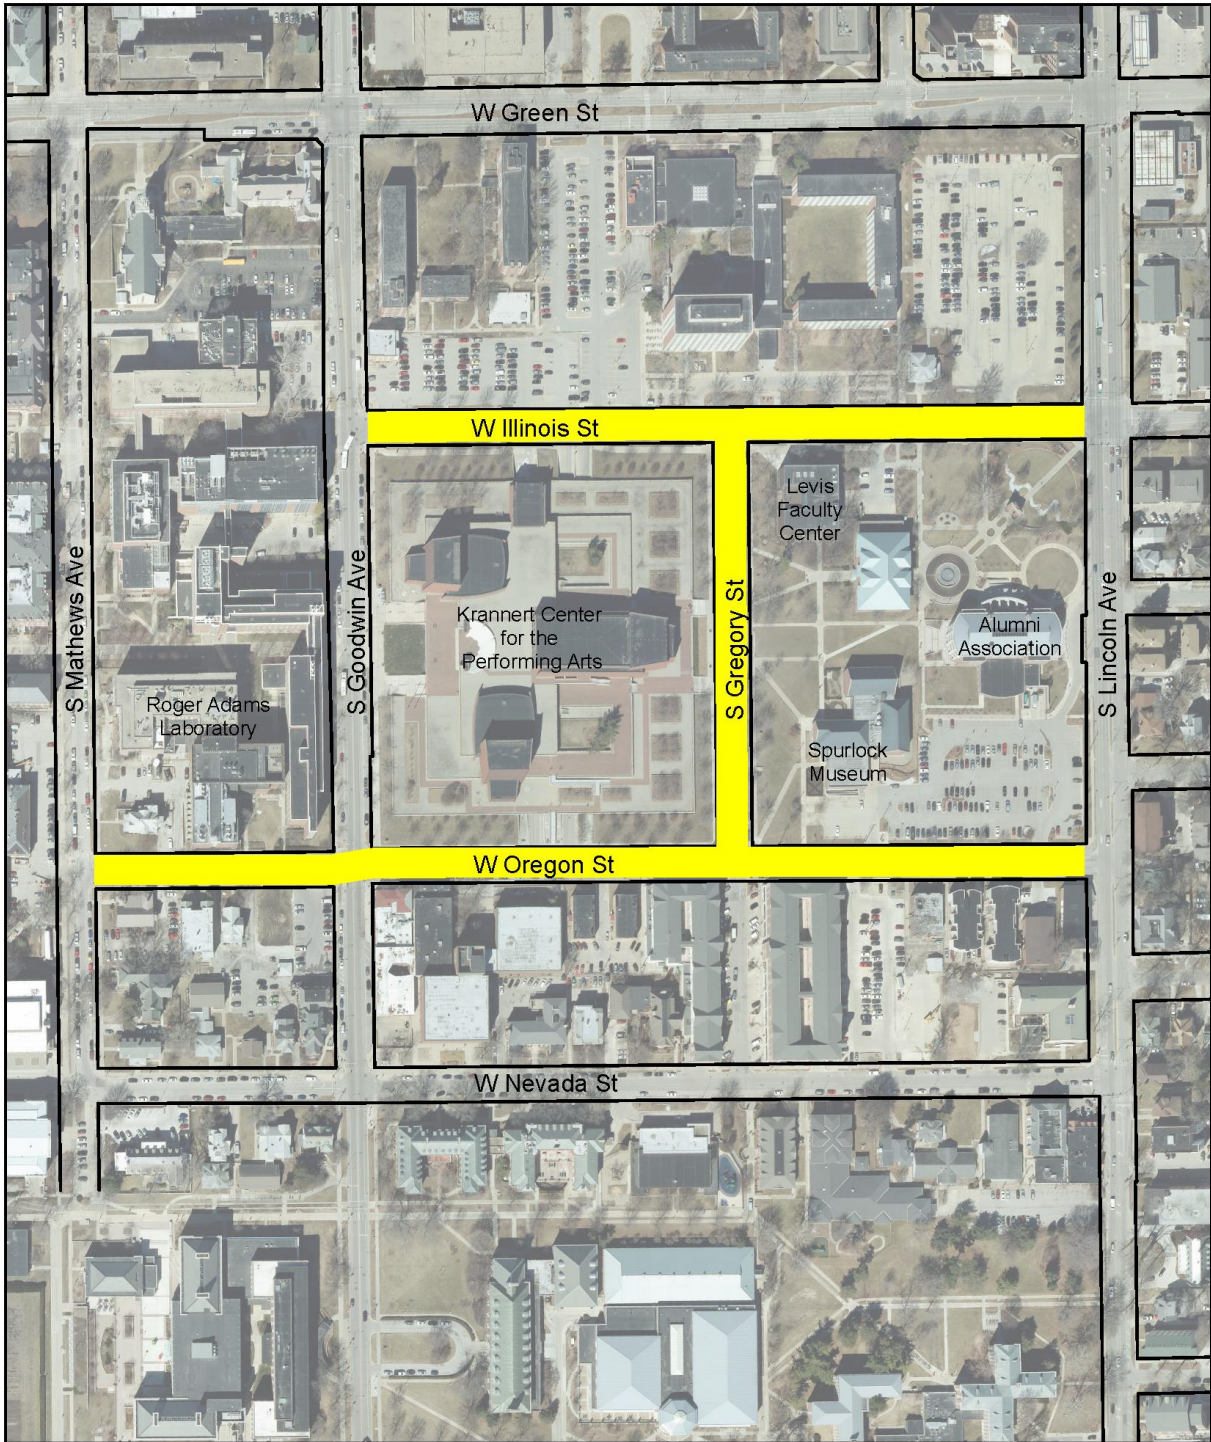

Once this contract is awarded to a contractor, the City of Urbana will send another letter describing the project timetable, contractor's name, and project contact information.

Information about the project will be posted on the City's website at <http://www.urbanaininois.us/projects>. If at any time you have questions, please contact me at 217/384-2342 or wrgrey@urbanaininois.us. The City thanks you in advance for your patience and cooperation.

Sincerely,

William R. Gray, PE
Public Works Director
