

October 1, 2012

TO: Members, Urbana Firemen's Pension Fund

FROM: Ronald Eldridge, Treasurer Run E.

Attached please find the annual financial report and audit for the Firemen's Pension Fund for the fiscal year ended June 30, 2012. Some important points of the audit are:

- 1) The financial statements have been prepared in accordance with generally accepted accounting principles ("clean opinion"). The auditor's opinion letter on this finding is on page 1.
- 2) In performing their work, the auditors did not discover any significant weaknesses in the fund's internal accounting controls. It is the policy of the auditor that no separate letter is issued in this circumstance.
- 3) Net worth of the fund increased \$857,309 to \$33,260,874 (a 2.6% increase). Last year was an increase of \$4,439,785 (+15.9%). An exam of the historical changes in net worth of the fund can provide evidence of whether the fund is in a growth or shrinking net worth position over time. Over the past 10 years, the fund has grown \$12,528,270 to \$33,260,874, an annual average increase of 5.4%. The following table details this change over the last 10 years:

<u>Year</u>	Change <u>Net Assets</u>	<u>% Chg.</u>	Ending <u>Balance</u>
6/30/12 6/30/11 6/30/10 6/30/09 6/30/08 6/30/07 6/30/06 6/30/05 6/30/04	+\$ 857,309 +\$4,439,785 +\$2,414,270 +\$ 162,394 -\$2,380,477 +\$2,830,080 +\$1,101,869 +\$1,767,376 +\$1,335,664	+ 2.6% +15.9% + 9.4% + 0.6% - 8.6% +11.3% + 4.6% + 8.0% + 6.4%	\$33,260,874 \$32,403,565 \$27,963,780 \$25,549,510 \$25,387,116 \$27,767,593 \$24,937,513 \$23,835,644 \$22,068,268
6/30/03	+\$ 816,087	+ 4.1%	\$20,732,604

4) The city's annual contribution was based upon an actuarial study performed by the actuarial firm of Tim Sharpe. The amount to be contributed by the City by law as calculated by the actuary was \$1,182,977. The fund policy is to request an amount that amortizes the accrued liability by a level dollar amount. This amount was \$1,407,666. The amount actually contributed by the City was \$1,403,306. On Page 13 is a detailed schedule of contributions made by the City for the last 10 years. Firefighters contribute 9.455% of their salary into the

- fund, which totaled \$330,530 (ratio of city contributions to employees was approximately 4.2 to 1. The amount to be requested by the fund from the City for next year is \$1,473,829 (4.7% increase).
- 5) The fund is at a 82.6% funding level. The funding level decreased from 98.5% in 2000 to 80.9% in 2005, due to the effect of the stock market (returns trail by about 3 years in the formula). In 2006 and 2007, funding levels improved to 85.5%. Since 2007, the funding level has remained approximately the same. A schedule of funding level over the last 10 years is shown on page 12 of the report.
- 6) One of the ways the fund minimizes investment risk is to stagger maturity dates of it's fixed income investments. The fund is weighted more heavily in the 0-5 year maturity cycles than the goal and underweighted in the other cycles. This is due to the fact that long term interest rates over the past 5 years has been considerably lower than normal. The policy goals remain the same and we will continue to analyze each investment purchase in the future and attempt to purchase investments with longer-term maturities, if the interest rate on these investments make sense. Following is a breakdown of U.S. and C.D. investments by maturities compared to the investment policy goals (also shown on page 8 of the financial audit report):

<u>Maturity</u>	Actual <u>6/30/12</u>	Actual <u>6/30/11</u>	Actual <u>6/30/10</u>	<u>Goal</u>
0-5 Yrs	62%	70%	70%	20%
6-10 Yrs	26%	19%	18%	20%
11-15 Yrs	12%	11%	9%	20%
16-20 Yrs	0%	0%	3%	20%
21-25 Yrs	0%	0%	0%	20%

7) A breakdown of the investment return by investment type follows:

		\$	9/	% Return		
	2012	<u>2011</u>	2012	<u> 2011</u>		
Savings/Money Markets	\$ 148	\$ 309	0.1%	0.2%

- Regular Retirement Pension for Firefighters hired before 1/1/11 (Tier1). Firefighters attaining the age of 50 or more with 20 or more years of creditable service are entitled to receive an annual retirement benefit of one-half of the salary at the date of retirement. The pension shall be increased by .208% for each month of service over 20 years, to a maximum of 75% (reached at 30 years of service). Employees with at least 10 years, but less than 20 years of credited service, may retire and receive a reduced benefit at age 60 (on a graduated scale 10 years service = 15%, 15 years service = 30%, 19 years service = 45.6%). Upon reaching the age of 55, a regular pension is increased .25% for each month retired (up to a maximum of 15%), and 3% annually thereafter each January 1. For example, a company officer retiring with 25 years of experience would receive 62.5% of his final salary.
- Regular Retirement Pension for Firefighters hired after 1/1/11 (Tier2). Firefighters attaining the age of 55 or more with 20 or more years of creditable service are entitled to receive an annual retirement benefit of one-half of the average salary over the last 8 years of employment (maximum average salary of \$106,800).. The pension shall be increased by 2½ % for each year over 20 years of service, to a maximum of 75% (reached at 30 years of service). Employees with at least 8 years, but less than 20 years of credited service, may retire at or after age 60 and receive a reduced benefit on a graduated scale (10 years service = 15%, 15 years service = 30%, 19 years service = 45.6%). Upon reaching the age

- of 55, the officer's pension is increased 3% for each year retired (up to a maximum of 15%); and 3% annually thereafter or by a factor of the CPI-U, whichever is less. There are 4 firefighters in Tier 2.
- <u>Disability Pension</u>. A firefighter that is unable to perform his or her duties due to a duty related injury is entitled to receive an annual payment of 65% of the salary at the date of disability. A firefighter that is unable to perform his or her duties due to an injury not related to the job is entitled to an annual payment of 50%. Upon reaching the age of 60, a disability pension is increased 3% of the original pension annually.
- Survivor Pension. If a firefighter dies on duty, the surviving spouse receives pension equal
 to the salary of the firefighter. If a firefighter dies due to reasons not related to duty, the
 surviving spouse assumes firefighter's pension. If an officer on pension dies, the surviving
 spouse receives 100% of the officer's pension (for officers hired before 1/1/11) and 2/3 of
 the officer's pension (for officers hired after 1/1/11).
- 11) The cost of benefit increases are expected to increase over time. Most members drawing benefits by law receive a 3% annually compounded increase in addition to increases in the number of retirees and the increased salaries at retirement that these benefits are based on. Total benefit costs increased 7.9% in 2012 compared to 2011 and have averaged an annual 3.5% increase over the last 3 years, 3.6% over the last 5 years and 4.3% over the last 10 years, as outlined in the chart below:

			%Inc	%Inc	%Inc	%Inc
	2012	2011	<u>1Yr</u>	<u>3Yr</u>	<u>5Yr</u>	<u>10Yr</u>
Disability	\$194,671	\$ 183,554	6.1%	3.4%	1.0%	3.4%
Service	1,418,098	1,287,669	10.1%	4.6%	4.6%	4.9%
Dependent	122,468	136,689	-10.4%	-3.0%	-1.5%	0.1%
Total	\$1,735,237	\$1,607,912	7.9%	3.5%	3.6%	4.3%

12) An examination of the number and make up of members receiving benefits provides insight into certain trends and changes affecting previous and future pension costs:

There was no change in the makeup of disability pensions during 2012. The average
monthly benefit at year-end was \$2,389 (increased 6.3% in 2012 over 2011). Upon
reaching the age of 60, a disability pension is increased 3% of the original pension
amount for each year retired plus 3% thereafter annually. In 2012, R. Johnson reached
the age of 60 and received his increase.

1987

60

23

- The only change in the makeup of service pensions was the retirement of J. McDuffy
 (age 55 with 25 years service). The average monthly benefit at year-end was \$3,540
 (an increase of 4.1%). Upon reaching the age of 55, a regular pension is increased
 .25% for each month retired (up to a maximum of 15) and 3% annually thereafter each
 January 1.
- The only change in the makeup of dependent pensions was the death of Mrs. Lovett (aged 84). The average monthly benefit at year-end was \$2,046 (an increase of 7.7%).

Dependent pensioners receive no increase in benefits. The minimum pension by law is required to be \$1,159.27/month.

- There are two retirees that are currently enrolled with another fire pension fund and repurchased their service time with Urbana. J. Ballew purchased back his previous service time in 2006 (eligible 02/02/2010 for a pension based on 7yrs, 4 months of service) but has not applied for a pension. M. Humer purchased back his previous service time in 2/10 (not eligible to draw benefits until 8/2013, based on 4 years of service time). M. Ashby is currently in the process of buying his previous time back. Two other employees are no longer working for the fire department but have not reached the age to draw benefits. T. Foster will be eligible in 10/2013 at age of 60 with 15 years of service (pension of 30% of final salary). A. Richardson will be eligible in 4/2017 at age 55 with 20 yrs and 4 months of service.
- 13) An examination of the number and make up of current firefighters provides insight into certain trends and changes affecting previous and future pension costs:

	# <u>F.F.</u>	Ave. <u>Age</u>	Ave. Yr. <u>Service</u>	Ave. <u>Salary</u>	Ave. Age New Hires
2012	54	41	12.0	\$67,508	3, age 28

1998	47	40	10.0	38,412	7, age 27
1997	40	38	11.0	33,911	3, age 30
1996	40	37	10.1	34,928	
1992	41	42	14.6	32,213	
1988	42	42	17.4	28,435	

- In 2012, one firefighter retired (McDuffy) and 3 new firefighters were hired (ages 25, 26, and 33). In the last 12 years (since 2000), the average age of current firefighters has increased from 36 to 41 years and the average years of service has increased from 8.5 years to 12.0 years.
- The average salaries of firefighters for pension purposes increased 2.8% in 2012. Over the last 5 years, the average salary of a firefighter in the fund has increased annually 3.5% over the last 5 years and 3.7% over the last 10 years. The actuary assumption on salary increases is 5.25%.

JAMES P. BRAY (RETIRED)

September 25, 2012

Board of Trustees City of Urbana, Illinois Firemen's Pension Fund Urbana, Illinois

Independent Auditor's Report

We have audited the accompanying statement of plan net assets of the City of Urbana, Illinois Firemen's Pension Fund, a fiduciary fund of the City of Urbana, as of June 30, 2012 and 2011, and the related statement of changes in plan net assets for the years then ended. These financial statements are the responsibility of the City's management. Our responsibility is to express an opinion on these financial statements based on our audit.

We conducted our audits in accordance with auditing standards generally accepted in the United States of America. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audit provides a reasonable basis for our opinion.

As described more fully in Note 1, the financial statements present only one fiduciary fund of the City of Urbana, Illinois, and are not intended to present fairly the financial position and results of operations of the City of Urbana in conformity with accounting principles generally accepted in the United States of America.

In our opinion, the financial statements referred to above present fairly, in all material respects, the plan net assets of the City of Urbana, Illinois, Firemen's Pension Fund, a fiduciary fund of the City of Urbana, Illinois, as of June 30, 2012 and 2011, and the changes in plan net assets for the years then ended in conformity with accounting principles generally accepted in the United States of America.

Accounting principles generally accepted in the United States of America require that the information on pages 13 and 14 be presented to supplement the basic financial statements. Such information, although not a part of the basic financial statements, is required by the Governmental Accounting Standards Board, who considers it to be an essential part of financial reporting for placing the basic financial statements in an appropriate operational, economic, or historical context. We have applied certain limited procedures to the required supplementary information in accordance with auditing standards generally accepted in the United States of America, which consisted of inquiries of management about the methods of preparing the information and comparing the information for consistency with management's responses to our inquiries, the basic financial statements, and other knowledge we obtained during our audit of the basic financial statements. We do not express an opinion or provide any assurance on the information because the limited procedures do not provide us with sufficient evidence to express an opinion or provide any assurance.

The accompanying notes are an integral part of these financial statements.

Notes to Financial Statements June 30, 2012 and 2011

Note 1 - Summary of Significant Accounting Policies:

The Pension fund was organized on April 4, 1927, and is exempt from federal income tax. The pension fund is created and operated under state laws that provide for a fund to be established to provide certain retirement benefits to firefighters and their dependents (see Note 2). The fund is managed by a board of five trustees, made up of two persons appointed by the mayor of the City of Urbana and two persons elected from the current firefighters and one elected from the retired firefighters. The Pension fund is also included in the annual report of the City of Urbana, as a fiduciary fund, according to the criteria specified in governmental accounting standards.

Investments are reported at fair value. Fair values for U.S. government securities, municipal bonds, stock mutual funds and money market accounts are based upon latest quoted prices. Investment transactions are reported as of the trade date. Interest income is recognized as earned. Realized gains and losses on sales and exchanges of securities and unrealized gains and losses are reported as net appreciation (depreciation) in the fair value of investments.

The fund considers all liquid investments with maturity of three months or less when purchased to be cash equivalents. At June 30, 2012 and 2011, there were no investments that were considered cash equivalents.

The fund is accounted for using the accrual basis of accounting. Revenues are recorded when earned and expenses are recorded when a liability is incurred. Employer contributions are primarily made from property taxes. Property taxes are recognized as revenues in the year for which they are levied. The 2011 levy is reported in fiscal year 2012 and the 2010 levy in fiscal year 2011. The taxes are certified against appraised real property as of the beginning of the previous calendar year. Benefits are recognized when the benefit is due and payable. Refunds are recognized when the employee resigns from employment with the city.

The preparation of financial statements requires management to make estimates and assumptions which affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of additions and deductions from plan net assets during the reporting period. Actual results could differ from those estimates.

Notes to Financial Statements June 30, 2012 and 2011

Note 2 - Pension Disclosure Information:

a. Plan Description:

The Pension fund is a defined benefit single-employer pension plan that covers all sworn firefighting personnel. Although this is a single-employer plan, the defined benefits and employee and employer contribution levels are governed by "Article 4, Firefighter's Pension Fund – Municipalities 500,000 and Under" of the Ilinois Pension Code (Illinois Compiled Statutes, 1992, Chapter 40. This fund is accounted for and reported as a pension trust fund.

At June 30, 2012 and 2011, the pension plan membership consisted of:

	<u>2012</u>	<u>2011</u>
Retirees and beneficiaries currently receiving benefits	46	43
Terminated plan members entitled to	•	_
but not yet receiving benefits	4	3
Active vested plan members	34	33
Active non vested plan members	<u>20</u>	<u>19</u>
Total	<u>104</u>	<u>98</u>
Number of participating employers	1	1

Following is a summary of the firemen's pension plan as provided for in the Illinois Statutes.

The firemen's pension plan provides retirement benefits as well as death and disability benefits. There are two tiers or levels of benefits:

Employees hired before January 1, 2011, attaining the age of 50 or more with 20 or more years of creditable service are entitled to receive an annual retirement benefit of one-half of the salary attached to the rank held at the date of retirement. The pension shall be increased by one-twelfth of 2½ % of such salary for each

Notes to Financial Statements June 30, 2012 and 2011

month over 20 years of service, to a maximum of 75% of such monthly salary. Employees with at least 10 years, but less than 20 years of credited service, may retire and receive a reduced benefit which begins at age 60. The monthly pension of a fire-fighter who retires after January 1, 1977 with 20 or more years of service, shall be increased annually, following the first anniversary date of retirement, and paid upon reaching at least the age 55, by .25% of the original pension times the number of months the employee has been retired since age 50 (up to a maximum of 15%), and 3% annually thereafter of the pension payable at the time of the increase. The monthly pension of a firefighter who retires with less than 20 years of service receives an annual 3% increase.

Employees that are hired after January 1, 2011, attaining the age of 55 or more with 20 or more years of creditable service are entitled to receive an annual retirement benefit of one-half of the average salary for the last 8 years of service (maximum average salary is \$106,800 if employee retires in calendar year 2011). The pension shall be increased by 2.5% of such salary for each additional year of service over 20 years up to a maximum of 75% of such salary. Employees with at least 10 years, but less than 20 years of credited service, may retire and receive a reduced benefit, which begins at age 60. Employees that have attained the age of 50 with at least 10 years of service may retire but their pension is reduced by 1/2% per year for each year the employee is under age 55. The monthly pension shall be increased annually, following the first anniversary date of retirement, and be paid upon reaching the age of at least 60 years, by the lesser of 1/12 of 3% of the original pension times the number of months the employee has been retired since age 60 (up to a maximum of 15%) or by a factor of the CPI-U, whichever is less. Dependents receive a pension of 2/3 of the member's pension at date of death. Dependents receive an annual increase under the same formula as the retired officer.

During the year, covered employees were required to contribute 9.455% of their salary to the Firemen's Pension Plan. If an employee leaves covered employment with less than 20 years of service, accumulated employee contributions may be refunded without accumulated interest. The City of Urbana is required to

Notes to Financial Statements June 30, 2012 and 2011

contribute the remaining amounts necessary to finance the plan as actuarially determined by an enrolled actuary. By the year 2033, the City's contributions must accumulate to the point where the past service cost for the Plan is fully funded.

b. Funding Policy and Annual Pension Cost:

The amount shown below as the "net pension obligation" is a standardized disclosure measure of the present value of pension benefits, adjusted for the effects of projected salary increases and step-rate benefits, estimated to be payable in the future as a result of employee service to date. The measure is intended to help users assess the funding status of the system on a going-concern basis, assess progress made in accumulating sufficient assets to pay benefits when due, and make comparisons among employers. The measure is an accrued liability and is a component of the funding method used to determine contributions to the system. Administrative costs are paid for by the plan, except for in-kind donated financial services from the City.

The funding policy provides for actuarially determined periodic contributions at rates that, for individual employees, accumulate assets gradually over time so that sufficient assets will be available to pay benefits when due. The rate for the City's employee group as a whole has tended to remain level as a percentage of annual covered payrolls. The contribution rate for normal cost is determined using the entry age normal actuarial funding method. The system used a level percentage amount method to amortize the unfunded liability over a 40 year period. The significant actuarial assumptions used to compute the actuarially determined contribution requirements are the same as those used to compute the net pension obligation.

Plan Expenses None

Annual Required Contribution	\$1,220,290
Interest on Net Pension Obligation	(128,651)
Adjustment to Annual Required Contribution	96,813
Annual Pension Cost	1,188,452
Contributions Made	1,483,810
Increase (Decrease) in Net Pension Obligation	(295,358)
Net Pension Obligation, Beginning of Year	(1,837,877)
Net Pension Obligation, End of Year	\$ (2,133,235)

The provisions of Public Act 096-1495 are reflected in this actuarial valuation, including changes to benefit provisions, actuarial methods, and the amortization period and method. There were no changes with respect to the actuarial assumptions from the prior year. There were no unexpected changes with respect to the participants included in the actuarial valuation from the prior year. There were no unexpected changes with respect to the Fund's investments from the prior year, however the asset valuation method was changed to the Straight Market Value from the 5-year Average Market Value in accordance with PA096-1495. The reduction in the required contribution was due to the investment return being greater than assumed (15.2%) and the increase in salaries less than assumed. The percent funded increased from 78.1% to 82.6%.

Note 3 - Deposits and Investments:

As of June 30, 2012, the pension fund had the following fixed income or interest bearing investments and maturities:

-9-

Notes to Financial Statements June 30, 2012 and 2011

<u>Interest rate risk</u>: In accordance with its investment policy, the fund manages its exposure to declines in fair values by 2 methods:

- (1) Structuring the fixed income portion of the portfolio such that maturity dates are staggered so as to avoid an undue concentration of assets in a given time period. The fund investment policy has the following goals concerning maturity dates: 20% of the portfolio should have a maturity date of 0-5 years, 20% 6-10 years, 20% 11-15 years, 20% 16-20 years, and 20% 21-25 years. The investment policy recognizes that these percentages are only goals and that the Treasurer when purchasing an investment, has the flexibility to deviate from these goals if he deems that the interest rate available on investments with certain maturities does not make this purchase advisable. As illustrated above, the fund's investments are over-weighted in the 0-10 year maturity levels and underweighted in the 11-25 year maturity levels. This is due to the fact that in the past few years, the interest rates on longer term maturities has been considerably lower than normal. The fund will continue to analyze each investment purchase in the near future and attempt to purchase investments with maturities above 10 years, if the interest rate on these investments makes this a prudent investment.
- (2) By diversifying the portfolio so that the impact of a potential drop in interest rates on a particular type of security will be minimized. The fund investment policy has the following goals, minimums and maximums concerning types of investments:

	% at	Policy				
	6/30/12	Goal	Minimum	Maximum		
U.S. Govt. & Agencies	40%	30%	30%	100%		
Cert. of Deposit	9%	10%	0%	20%		
Municipal Bonds	1%	5%	0%	5%		
Corporate Bonds	0%	0%	0%	5%		
Total Fixed Income	50%	45%	30%	100%		
Stock Equity						
Mutual Funds	50%	55%	0%	55%		
Total	100%	100%	n/a	n/a		

At June 30, 2012, amounts invested in U.S. Govt. and Agencies are slightly over-weighted and amounts invested in stock equity mutual funds are slightly underweighted when compared to the policy goals. This is due to a

Notes to Financial Statements June 30, 2012 and 2011

drop in the market value of the stock equity funds near the end of 2012. It is the policy of the fund to rebalance investments after year-end. All amounts are within the policy minimum and maximum levels.

Credit Risk: The pension fund is limited by State Statutes and fund investment policy to invest only in obligations of the U.S. Government Treasury and its agencies, non-negotiable certificates of deposit and savings accounts, if insured by the Federal Deposit Insurance Corporation, obligations of any state or political subdivision, obligations of any corporation and common stock mutual funds (up to a maximum of 65% of the fund's net present assets, and money market mutual funds in which the portfolio is limited to U.S. government securities and agencies. Investments in U.S. Government securities and certain U.S. Government Agency securities are not considered to be of any credit risk since they carry the full obligation and guarantee of the U.S. Government. The fund has also invested in certain U.S. Government Sponsored Enterprises (G.S.E.) that are not secured by an explicit guarantee of the U.S. Government. One-hundred percent of these G.S.E. investments carry a AAA rating from Moody's and Standard and Poors. The fund considers the credit risk of all U.S. Government securities to be similar and does not distinguish these securities for purposes of policy goals, minimum and maximum investment levels. Investments in municipal bonds, while not guaranteed, are considered to be of minimal risk since they are investment grade and the amount invested is small. At June 30, 2012, the fund had \$55,250 invested in money market accounts. These money market accounts are not guaranteed and are not rated. The fund does not believe that the credit risk for these money market accounts to be significant in that the amounts invested are always small. The amount at June 30, 2011 was unusual in that a \$680,000 investment matured near year-end. This amount was invested shortly after year-The investment policy limits any investment in certificates of deposit to \$250,000 per bank with the exception of Busey Bank, Urbana. There is no limit placed on investments of certificates of deposit at Busey Bank. However, the Board reviews the credit rating of Busey Bank quarterly for any possible negative change. At June 30, 2012, the fund's investments in certificates of deposit in Busey Bank was \$380,000 and below the \$250,000 limit for all other banks.

Concentration of Credit Risk: The only investments in any single security or organization that are in excess of 5% of the total investments or 5% of net assets (except for investments in U.S. Government and its credit guaranteed agencies and investments in certain mutual funds) is \$2,416,321 invested in the securities of the Federal Financing Corporation (FICO) which totals 7.6% of total investments and 7.3% of net assets and \$2,504,649 invested in the securities of the Federal National Mortgage Association (FNMA) which totals 7.9% of total investments and

Notes to Financial Statements June 30, 2012 and 2011

7.55% of net assets. These securities carry an implied U.S. Government guarantee. The fund considers the credit risk of these investments to be similar to investments in U.S. Government Agency securities that are explicitly guaranteed by the U.S. Government. Thus the fund does not believe a possible concentration of credit risk due to this investment is significant enough to address in the investment policies.

<u>Custodial Credit Risk for Deposits</u>: is the risk that in the event of a bank failure, the fund's deposits may not be returned. Deposits in federally insured banks and savings and loans are insured in an amount equal to \$250,000 for the fund plus an amount for each member's beneficial interest in the deposits, limited to an amount equal to \$250,000 divided by the largest beneficial interest percentage of a member. At year-end, the fund was not exposed to custodial credit risk for deposits as all deposits were insured.

<u>Custodial Credit Risk for Investments</u>: is the risk that in the event of the failure of the counterparty, the fund may not be able to recover the value of its investments or collateral securities that are in the possession of an outside party. The fund has no custodial credit risk in that all of its investments are insured.

Note 4 – Member Loans Receivable:

During 2011, a member of the fund was required to repay into the fund an amount of \$2,196 that was paid in error in previous years. The pension fund agreed to allow this member to repay this amount in 12 equal installments of \$188, at no interest. The last payment was made to the fund in April 2012.
